Re: County Environmental of Wyandot
Director's Authorization
Approval
Municipal Solid Waste Landfills
Wyandot County
MSWL018797

Subject: Ohio Administrative Code (OAC) Rule 3745-27-10(E)(9)(b) Approval

Dear Mr. Traub:

On October 31, 2014, the Ohio Environmental Protection Agency (Ohio EPA), Division of Materials and Waste Management (DMWM), Northwest District Office (NWDO) received a document titled, "OAC-3745-27-10(E)(9) Request to Return to Detection Monitoring For Wells RW-11 and RW-12 County Environmental Landfill of Wyandot, Wyandot County" dated October 29, 2014, for the County Environmental of Wyandot Landfill (Facility) located in Wyandot County.

According to the document, analysis of the assessment evaluation indicated that the following statistically significant changes were due to natural variation in groundwater quality: ammonia and barium at RW-11, and chloride at RW-12.

Pursuant to OAC Rule 3745-27-10(E)(9)(b), the owner or operator may demonstrate that a source other than the sanitary landfill facility caused the contamination, or that the statistically significant change resulted from error in sampling, analysis, or statistical evaluation or natural variation in ground water quality. A report documenting this demonstration must be submitted to and approved by Ohio EPA.

The October 29, 2014, document concluded that the statistically significant changes for ammonia and barium at RW-11, and chloride at RW-12 were due to natural variation in ground water quality and not as a result of impact from the landfill.

Ohio EPA has reviewed the applicable information and concurs with the demonstration for ammonia and barium at RW-11, and chloride at RW-12. Therefore, pursuant to OAC Rule 3745-27-10(E)(9)(b), the owner or operator is hereby authorized to reinstate the detection monitoring program at the Facility for monitoring wells RW-11 and RW-12.

Should future or existing ground water sampling results indicate statistically significant changes in ground water monitoring parameters, the owner or operator will be required to either enter into the ground water quality assessment monitoring program in accordance with OAC Rule 3745-27-10(E) or obtain approval to remain in the detection monitoring program pursuant to OAC Rule 3745-27-10(D)(7)(c).

Mr. Randy Traub

This approval shall not be construed to release the owner or operator from the obligation to comply with the requirements of any other ground water quality assessment monitoring program being conducted at the Facility.

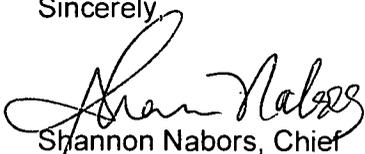

A detailed account of Ohio EPA's review of the ground water demonstration will be sent to you under separate cover.

You are hereby notified that this action of the Director of Environmental Protection (Director) is final and may be appealed to the Environmental Review Appeals Commission pursuant to Ohio Revised Code Section 3745.04. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00 made payable to "Treasurer, State of Ohio." The Commission, in its discretion, may reduce the fee if by affidavit it is demonstrated that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
77 South High Street, 17th Floor
Columbus, Ohio 43215

If you have any questions concerning this letter, please contact Tyler Madeker of Ohio EPA, NWDO at 419-373-3078.

Sincerely,

Shannon Nabors, Chief
Northwest District Office
for Craig W. Butler, Director
