Modified Ohio Hazardous Waste Facility Installation and Operation Permit
Division of Materials and Waste Management

Permittee: Envirite of Ohio, Inc.  
U.S. EPA ID: OHD980568992

Facility Name: Envirite of Ohio, Inc.
Mailing Address: 2050 Central Avenue, SE
City: Canton State: Ohio Zip: 44707

<td>This Modified Ohio Hazardous Waste Facility Installation and Operation Permit is issued pursuant and subject to Section 3734.05(I) of the Ohio Revised Code and Rule 3745-50-51(D) of the Ohio Administrative Code.</td>
</tr>
<tr>
<td>The Ohio Hazardous Waste Facility Installation and Operation Permit for the facility with the above-referenced ID number as issued by the Ohio Environmental Protection Agency and journalized on July 17, 2014, is hereby incorporated by reference in its entirety, except as it may be modified herein. This modification of the permit shall remain in effect until such time as the Ohio Hazardous Waste Facility Installation and Operation Permit is renewed, modified, withdrawn, suspended, or revoked.</td>
</tr>
<tr>
<td>The Permittee shall comply with all requirements of the modified permit application as amended or supplemented on October 1, 2014. The information contained in the modified permit application is incorporated herein by reference. Specifically, all written statements regarding the specifications, locations, or capabilities of the processes, equipment, containment devices, safety devices or programs, or other matters made by the applicant in the permit modification application are hereby incorporated as express, binding terms and conditions of this modified permit.</td>
</tr>
<tr>
<td>The modified Terms and Conditions of this permit are attached hereto and are incorporated herein by reference. The modified Terms and Conditions supersede and replace the corresponding pages found in the July 17, 2014 renewal permit.</td>

Permit Modification Approval

Entered into the Journal of the Director on: February 20, 2015

Craig W. Butler, Director
Ohio Environmental Protection Agency
may only render waste containing the following characteristic codes non-
hazardous:

D002, D003, D004, D005, D006, D007, D008, D009, D010, and D011

U.S. EPA Region V allows the Permittee to delist wastes mixed in the SPU #1
tanks.

The Permittee may dedust wastes in SPU #1 tanks T30-T35 to minimize the
potential for fugitive emissions from the unloading process.

The Permittee is authorized to construct and operate a second solids processing
unit, Solids Processing Unit #2 (SPU #2). SPU #2 will have six in-ground
hazardous waste storage tanks (T36, T37, T38, T39, T40, T41), and four waste
blenders (R34, R35, R36, R37). The SPU #2 in-ground tanks will each measure
12 feet 6 inches by 18 feet by 10 feet deep with a maximum capacity of 83.3
cubic yards (16,800 gallons). The open top tanks will be constructed of
reinforced concrete and are to be set into the floor of the building and provided
with a leak detection system. Each blender will consist of a vat and rotating
element and is to be fabricated of stainless steel with abrasion resistant liner
plates, and will have a volume capacity of approximately 4,400 gallons (20 cubic
yards).

The Permittee is authorized to construct and operate a Dry Solids Handling
System (DSHS) for treatment of dry hazardous waste. Dry wastes will arrive and
forth in Permit Condition B.1(b).

(c) The Permittee shall store and treat in tanks only the hazardous waste codes specified in the approved Part B permit application and summarized below:

D001*, D002, D003, D004, D005, D006, D007, D008, D009, D010, D011, D018, D019, D021, D022, D023, D024, D025, D026, D027, D028, D029, D030, D034, D035, D036, D038, D039, D040, F006, F007, F008, F009, F011, F012, F019, K002, K003, K004, K005, K006, K007, K008, K009, K061, K062, K069, K100, K171, K174, K175, K176, K177, K178, F039
*(D001 is the oxidizer category only)

(d) The Permittee is prohibited from storing or treating hazardous waste that is not identified in this permit condition. Incoming hazardous waste carrying the following waste codes and with concentrations in excess of the Land Disposal Restrictions (LDR) limits may not be subjected to the stabilization/solidification treatment process:

D018, D019, D021, D022, D023, D024, D025, D026, D027, D028, D029, D030, D034, D035, D036, D038, D039, D040, F039

(e) The following 15 categories of listed waste may be rendered non-hazardous when treated in SPU tanks T30-T35 and R30-R37 in accordance with the November 7, 1986, (Federal Register, Volume 51, page 41323) delisting as granted by U.S. EPA:

F006, F007, F008, F009, F011, F012, F019, K002, K004, K005, K006, K007, K008, K062, K171

(f) The Permittee may treat characteristic hazardous waste in the following tanks:

SPU #1: T30, T31, T32, T33, T34, and T35 and R30 to R37.

Only the following characteristic waste codes may be rendered nonhazardous when treated in the aforementioned tanks:

D002, D003, D004, D005, D006, D007, D008, D009, D010, D011
U.S. EPA Region V allows the Permittee to delist waste mixed in the SPU #1 tanks.

D.2 Limitations on Treatment of Hazardous Waste in Tanks

(a) The Permittee is authorized to treat hazardous waste in the tanks specified in the table below. The Permittee shall treat in tanks only the hazardous waste codes specified in the permit application and summarized below:

(b) The provision of Condition D.2(a) shall not apply to the Permittee's activities as a generator treating hazardous waste in tanks on-site in compliance with the provisions of OAC Rule 3745-52-34.
