**Subject: County Environmental Landfill of Wyandot, Wyandot County
Ohio Administrative Code (OAC) Rule 3745-27-10(C)(7)(g) Approval**

Dear Mr. Krutsinger:

On September 24, 2020, the Ohio Environmental Protection Agency (Ohio EPA), Division of Materials and Waste Management (DMWM), Northwest District Office (NWDO) received a request titled, "*Statistical Analysis Program for Ground Water Quality Monitoring (Revision 14)*" (Request), dated September 24, 2020. The Request was submitted by Eagon and Associates, Inc., on behalf of Republic Services, and proposed to update the background data base to include statistically significant copper, ammonia, nickel, potassium, and sodium data for wells RW-9, SW-9, BW-3, RW-11, and RW-12 at County Environmental Landfill of Wyandot (Facility) located at 11164 County Highway 4, Carey, Ohio.

Pursuant to OAC Rule 3745-27-10(C)(7)(g), background data can be added only in blocks of data resulting from the analysis of four or more statistically independent samples after the data have been statistically compared to the current background data and no statistical differences are detected, unless another method is deemed acceptable to the director.

Ohio EPA has reviewed the Request and concurs that the statistically different data noted in the table below be added to the existing background datasets. Ohio EPA's review determined that the owner or operator has provided sufficient evidence to demonstrate that the statistically different data can be added to the existing background datasets and meets the requirements of OAC Rule 3745-27-10(C)(7)(g) in the document. Therefore, Ohio EPA approves the Request pursuant to OAC Rule 3745-27-10(C)(7)(g) at County Environmental Landfill of Wyandot.
