**Re: Carbon Limestone Landfill, LLC
Authorization
Approval
Municipal Solid Waste Landfills
Mahoning County
MSWL018781**

**Subject: Carbon Limestone Landfill, LLC
Ohio Administrative Code (OAC) Rule 3745-27-10(D)(7)(c)(ii) Approval**

Dear Mr. Heher:

On April 16, 2015, the Ohio Environmental Protection Agency (Ohio EPA), Division of Materials and Waste Management (DMWM), Northeast District Office (NEDO), received a document titled "*OAC Rule 3745-27-10(D)(7)(c)(ii) Alternate Source Demonstration Report for Chloride in Well MW-115A; Cobalt in MW-204A; Barium in Well MW-205B; Sodium in Well MW-208B; Ammonia and Cobalt in MW-217A; Ammonia and Sodium in Well MW-240A; and Chloride and Sodium in P-26A, Request for Director's Approval,*" dated April 15, 2015, for Carbon Limestone Landfill, LLC. (Facility) located in Mahoning County. This document was submitted by Eagon and Associates, Inc., and contains the ground water sampling results and the statistical analysis from the November 17, 2014, ground water sampling event at the Facility.

According to the document, analysis of the ground water detection monitoring data indicated that the following statistically significant changes were detected: Chloride in Well MW-115A; Cobalt in MW-204A; Barium in Well MW-205B; Sodium in Well MW-208B; Ammonia and Cobalt in MW-217A; Ammonia and Sodium in Well MW-240A; and Chloride and Sodium in P-26.

Pursuant to OAC Rule 3745-27-10(D)(7)(c)(ii), the owner or operator may demonstrate that a source other than the sanitary landfill facility caused the contamination, or that the statistically significant change resulted from error in sampling, analysis, or statistical evaluation or natural variation in ground water quality. A report documenting this demonstration must be submitted to and approved by Ohio EPA. If the owner or operator does not obtain approval to continue detection monitoring not later than two hundred ten (210) days from initial sampling, the owner or operator is required to comply with the provisions of OAC Rule 3745-27-10(E) for ground water quality assessment monitoring.

The April 15, 2015, document concluded that the statistically significant differences for: cobalt in ground water samples from wells MW-204A and MW-217A; ammonia in ground water samples from wells MW-217A and MW-240A; barium in ground water samples from well MW-205B; and sodium in ground water samples from well P-26A and MW-240A were due to natural variation and not as a result of impact from the landfill. The April 15, 2015, document also concluded that the statistically significant changes for chloride in ground water samples from wells MW-115A and P-26A, and sodium in ground water samples from well MW-208B (424 mg/L) were due to a source other than the landfill. The statistically significant differences were a result of changes caused by on-site construction activities related to passive drainage system features or cell construction activities, combined with increased precipitation from 2007 through 2013, and not as a result of impact from the landfill. Monitoring wells MW-115A, MW-204A, MW-205B, MW-208B, MW-217A, MW-240A and P-26 were initially sampled on November 17, 2014.

Ohio EPA has reviewed the applicable information and concurs with the demonstration included in the April 15, 2015, document. Therefore, pursuant to OAC Rule 3745-27-10(D)(7)(c)(ii), the owner or operator is hereby authorized to continue the detection monitoring program at the Facility for monitoring wells wells MW-115A, MW-204A, MW-205B, MW-208B, MW-217A, MW-240A and P-26.

Should future or existing ground water sampling results indicate statistically significant changes in ground water monitoring parameters, the owner or operator will be required to either enter into assessment monitoring in accordance with OAC Rule 3745-27-10(E) or obtain approval to remain in the detection monitoring program.

You are hereby notified that this action of the Director of Environmental Protection (Director) is final and may be appealed to the Environmental Review Appeals Commission pursuant to Ohio Revised Code Section 3745.04. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00 made payable to "Treasurer, State of Ohio." The Commission, in its discretion, may reduce the fee if by affidavit it is demonstrated that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
77 South High St., 17th Floor
Columbus, Ohio 43215
