Dear Ms. Tremblay:

Tremcar USA, Inc. ("Tremcar") issued a Field Activities Report on October 16, 2015, that summarized a series of soil and ground water sampling activities that were conducted at the facility. The Field Activities Report was to serve as a basis to determine whether a final closure certification report would be issued or if the closure plan would need to be amended for additional field activities and remedial work at the site.

On May 31, 2016, Tremcar submitted a request for an extension to the closure period specified in the revised hazardous waste closure plan pursuant to Ohio Administrative Code (OAC) rule 3745-55-13(B). I approved the extension on June 21, 2016, and closure certification was to be due by December 9, 2016, in order to complete final closure activities within 180 days as required by OAC 3745-55-13(B).

Tremcar submitted a Supplemental Investigation Work plan to Ohio EPA which was received on September 26, 2016. Ohio EPA reviewed the Supplemental Investigation Work Plan and had comments regarding the need to conduct hard surface decontamination of the hazardous waste management units, and to install additional soil borings and wells to determine the nature and extent of contamination at the facility. On November 16, 2016, Tramcars' consultant requested another extension to the closure period due to their scheduling and to allow time for Ohio EPA to review the Supplemental Investigation Work Plan for another six months.
My staff reviewed your request for an extension to the closure period, and recommends that the extension be granted per OAC rule 3745-55-13(B). I concur, and am therefore granting this extension request. This extension is being granted for the above referenced closure plan and expires on May 31, 2017.

Please be advised that approval of this closure extension request does not release Tremcar from any responsibilities as required under the Hazardous and Solid Waste Amendments of 1984, regarding corrective action for all releases of hazardous waste or constituents from any solid waste management unit, regardless of the time at which waste was placed in the unit.

When closure is completed, OAC rule 3745-55-15 requires the owner or operator of a facility to submit to the director of Ohio EPA, certification by the owner or operator and an independent, registered professional engineer, that the facility has been closed in accordance with the approved closure plan. The certification by the owner or operator shall include the statement found in OAC rule 3745-50-42(D). These certifications should be submitted to:

Ohio Environmental Protection Agency
Division of Environmental Response and Revitalization
P.O. Box 1049
Columbus, Ohio 43216-1049
Attn: Erik Hagen, Engineering Section

A copy should also be sent to:

Ohio Environmental Protection Agency
Division of Environmental Response and Revitalization
Southeast District Office,
2195 Front Street
Logan, Ohio 43138
Attn: John Rochotte

If you have any questions about implementing this closure plan, contact Don Vogel at 614-644-4826.

Sincerely,

Craig W. Butler
Director
