Re: Lead line Mapping Project

To Whom It May Concern,

Scot Industries was built in 1989 at 6578 Ashland Rd, Wooster Ohio 44691 after the lead service line ban of 1986. The company that installed all the plumbing in this facility is MW Robinson. This company is the only company that has done any service at this facility. I have included a statement from the owner and the person that actually installed all the plumbing and maintained it since 1989. Please accept this statement as Scot Industries is a lead free facility.

Regards,

Darin Johnston
Safety Manager

MW ROBINSON CO.

Wooster, OH 44691

Attn: Darin Johnston
Re: Lead waterline report

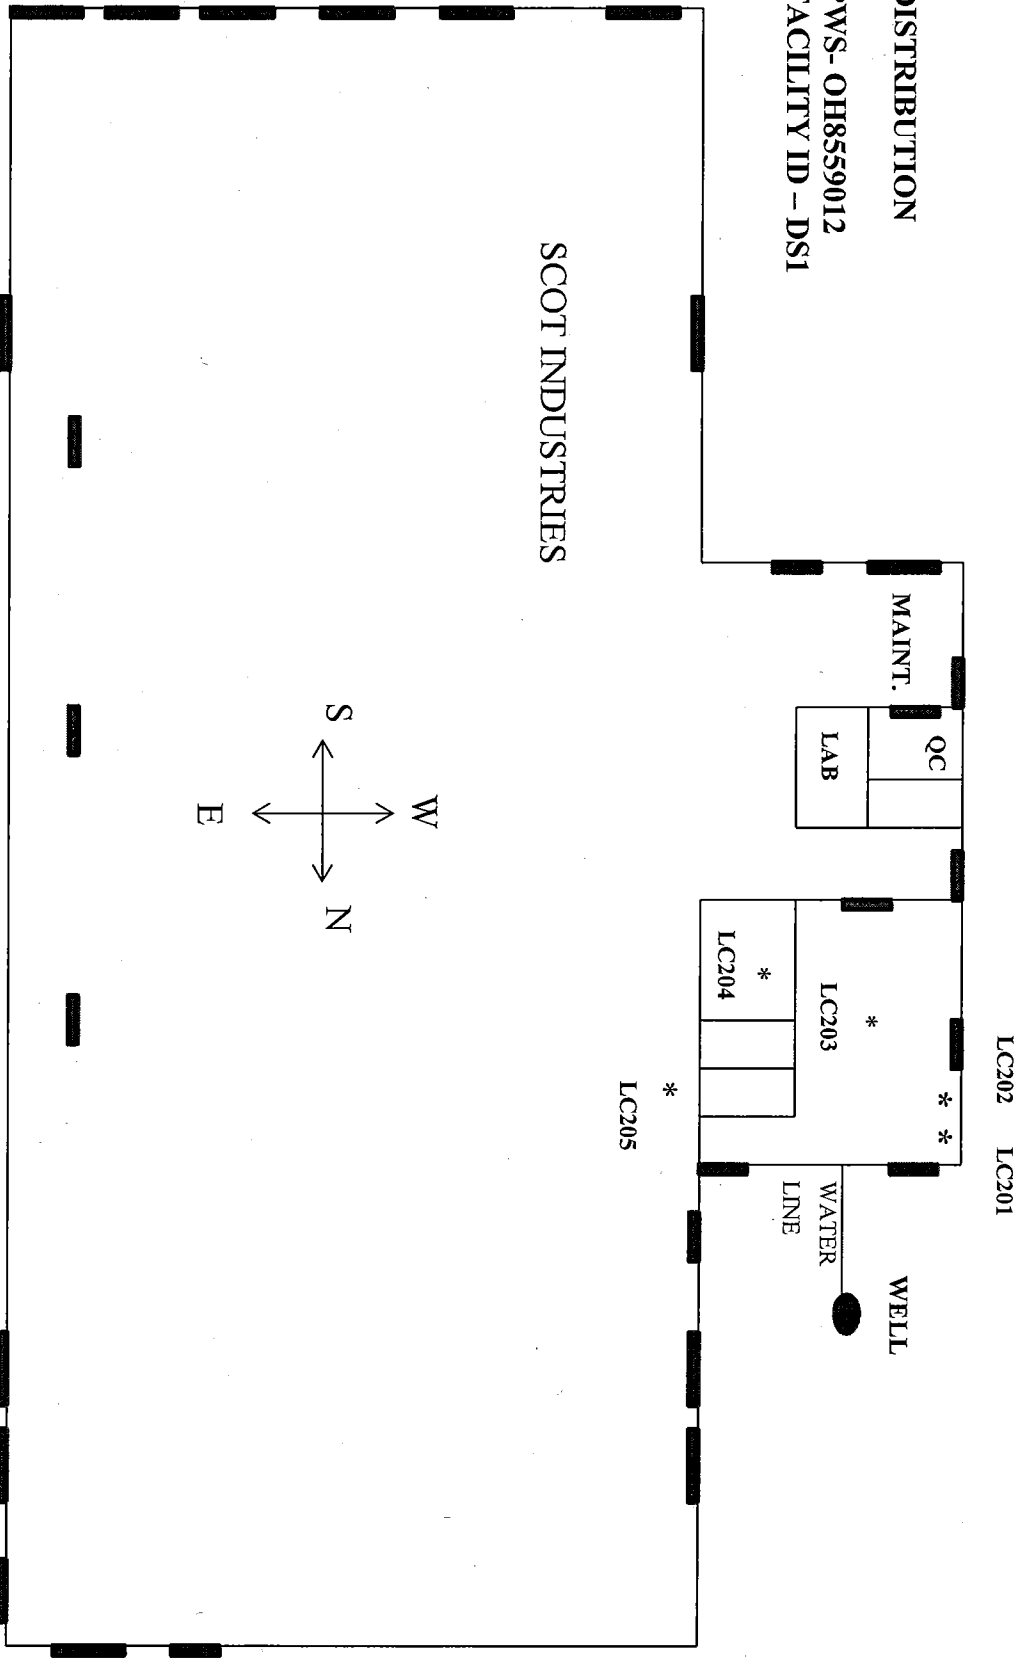

M.W Robinson Company was the original plumbing company that installed the water distribution system in the building and the only plumbing company to do work in the building since. No lead lines were or have been installed in the building.

Respectfully,

Chris Robinson
