

RE: Minster Village
Report
Drinking Water Program
Auglaize County
PWS ID: OH0600412

Buildings in Ohio built prior to 1996 or that use plumbing material or solder manufactured before 1996 may have materials with greater than 8% lead and are at a higher risk of contributing lead to the drinking water. Materials manufactured after 1996. In addition, buildings built and plumbing materials manufactured after 2014 were required to have less than 0.2% lead by weight and have the lowest risk for contributing lead to the drinking water. It should be noted however that, although prohibited, some use of leaded solder or leaded components may have occurred after the prohibitions became effective.
