

**Lead Mapping Legend**

- No Lead = ■
- Low Potential = ■
- High Potential = ■
- Water Lines = —
- Valves = ○
- Fire Hydrants = ●

The Village of Utica 's water was installed around 1937. The majority of our structures were built prior to the mid 1950's. Utica has based their findings on maintenance performed, service installation and history of structure. The history of structure is not confirmed to have lead but assumed with the age that the possibility is greater.
