South Range Local Schools K-12 PWS
11300 Columbiana-Canfield Rd. Ste B
Canfield, OH 44406
PWS ID: OH5054712

Summary of Maps:

The treated water leaves location 1 on map #1 and supplies the K-12 Facility. A visual inspection shows overhead copper supply lines for the facility. The K-12 campus was constructed in 2009-2010. In 2012-2013 South Range Schools proceed with a corrosion-control recommendation from the Ohio EPA. The result was treatment with Orthophosphate to help with lead and copper from leaching out of pipes/fixtures.

Map #1 Overview

Tap locations are numbered. LC201 through LC208 and LC218 through LC220 are the SMP collection points for sampling. The facility is reported a Tier 1. There are many fixtures containing copper, stainless steel, brass, and zinc alloys. These same metals can be found in mixing valves, check valves, and solder joints throughout the facility. Visual inspection has shown copper pipes used for water distribution. This facility is reported as Tier 1 and was constructed prior to the lead-free mandate of 2014, but after lead-free standards of 2008.

Map #2 Overview

Upper floors of the K-12 Facility are the same as the lower. I have identified SMP IDs LC209 to LC217. The facility is reported as Tier 1. There are many fixtures containing copper, stainless steel, brass, and zinc alloys. These same metals can be found in mixing valves, check valves, and solder joints throughout the facility. Visual inspection has shown copper pipes used for water distribution.

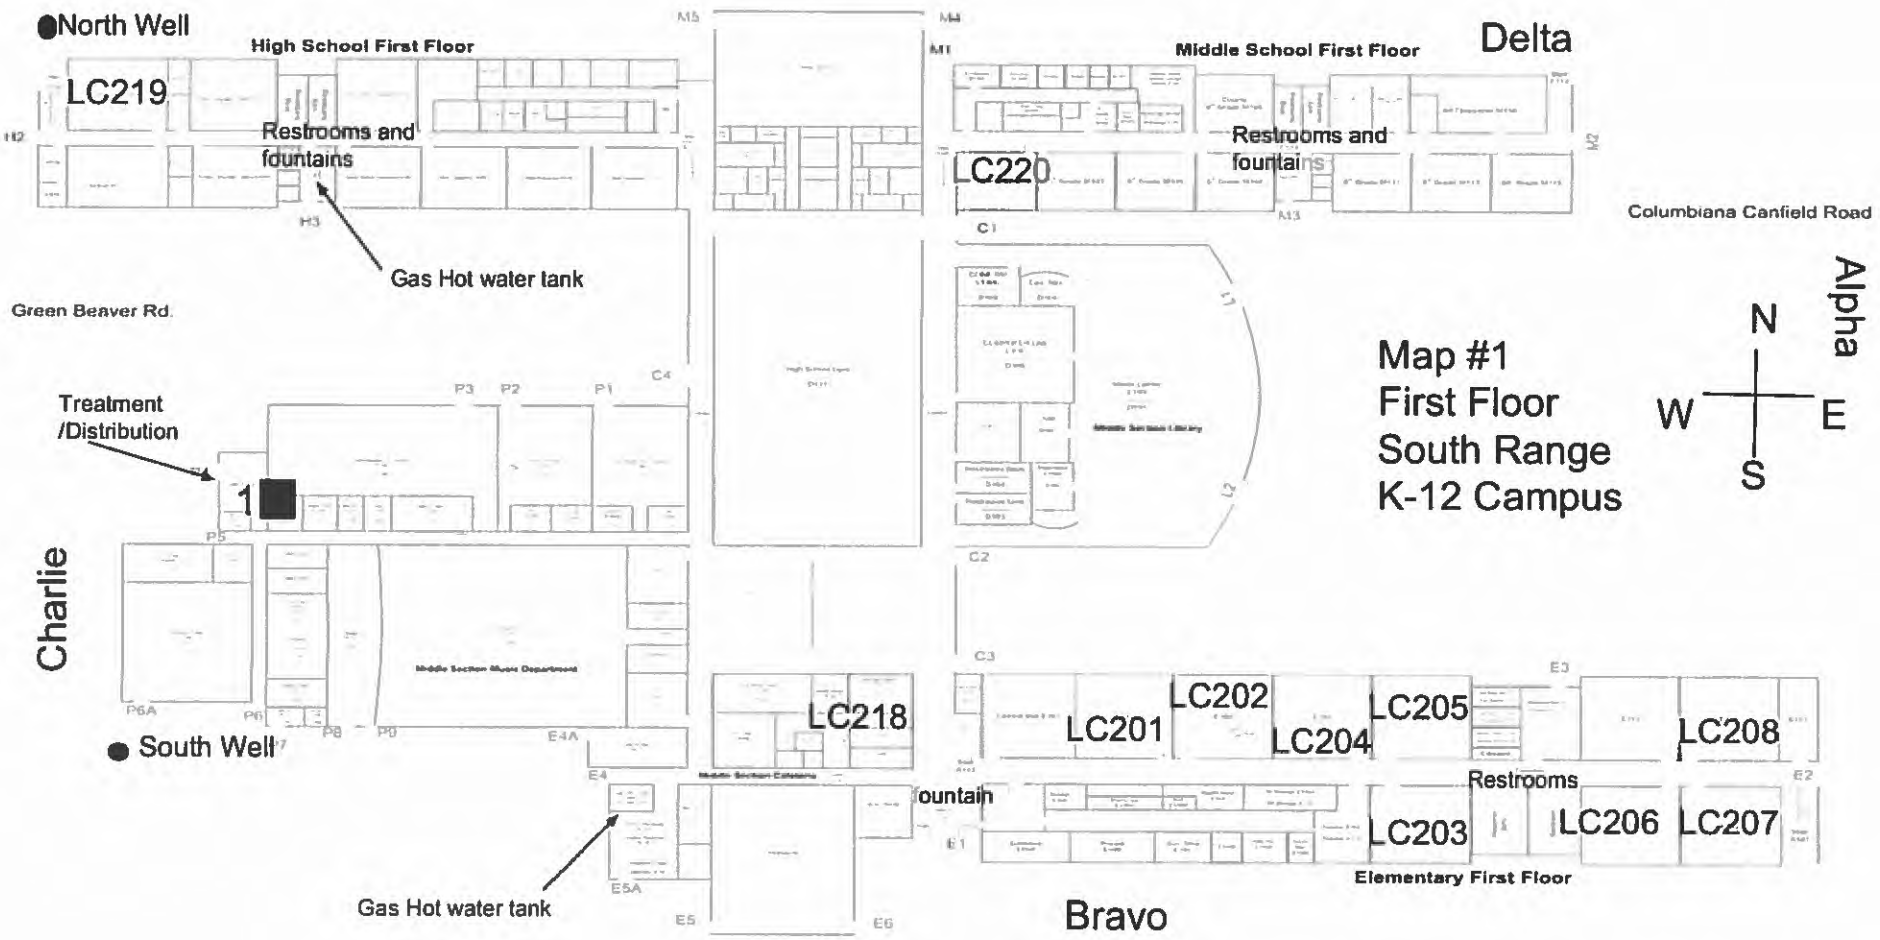

Please review the maps and let us know if more information is required.

Thank You,

Dean Pagnotta,
Water Operator/Director of Facilities
