Lead and Copper Rule Narrative  
Ada Water Dept.  
PWS # 3300012

The buildings in Ada that are served by the Ada Water Dept. use a combination of copper and plastic from the water main to the customer connection. Copper, galvanized and plastic lines are used from the Village/customer connection to the building. There are no known municipal or private lead service lines in the distribution system.

There are no records to indicate what building plumbing materials are used. During visits to buildings, soldered copper, galvanized and plastic piping has been observed.
