VERIFICATION FORM FOR COMMUNITY PUBLIC WATER SYSTEMS CLAIMING NO LEAD SERVICE LINES

The owner or operator of all community public water systems must identify and map areas of their distribution system that are known or are likely to contain lead service lines. Systems must submit a copy of the applicable map to the Ohio Department of Health and the Ohio Department of Job and Family Services. Systems must also submit a report to the director containing at least both of the following: (1) The applicable map with narrative, and (2) A list of sampling locations used to collect samples as required by Ohio Revised Code (ORC) Section 6109.121 and any rules adopted thereunder, including contact information for the owner and occupant of each sampling site.

Should a water system determine no lead service lines exist in their distribution system, they must provide information stating they reviewed, at the minimum, historical permit records and local ordinances, distribution maintenance records and information pertaining to installation dates or materials for all services lines. This information must be verified below.

I HEREBY CERTIFY THAT THE FOLLOWING METHOD(S) WERE USED TO DETERMINE NO LEAD SERVICE LINES EXIST IN THIS WATER SYSTEM'S DISTRIBUTION SYSTEM, AS REQUIRED BY ORC 6109.121(F):

Lead Mapping Verification Form Revised 2/14/17

March 2, 2017

The Rio Grande Water System serves both residential and commercial buildings with a wide range of ages. All water distribution lines and service lines are composed of either cast iron, ductile iron, pvc, pep and/or copper.

MAP EXPLANATION:

- The water lines are highlighted in yellow and are considered low risk since the age of the structures served and the possibility that they could contain some plumbing and/or fixtures that were installed prior to the 1982 and/or 1998 lead by weight regulations.
- The BLACK dots labeled LC### are the lead monitoring sample points submitted on the Lead & Copper Sample ID Spreadsheet
