

VERIFICATION FORM FOR COMMUNITY PUBLIC WATER SYSTEMS CLAIMING NO LEAD SERVICE LINES

The owner or operator of all community public water systems must identify and map areas of their distribution system that are known or are likely to contain lead service lines. Systems must submit a copy of the applicable map to the Ohio Department of Health and the Ohio Department of Job and Family Services. Systems must also submit a report to the director containing at least both of the following: (1) The applicable map with narrative, and (2) A list of sampling locations used to collect samples as required by Ohio Revised Code (ORC) Section 6109.121 and any rules adopted thereunder, including contact information for the owner and occupant of each sampling site.

Should a water system determine no lead service lines exist in their distribution system, they must provide information stating they reviewed, at the minimum, historical permit records and local ordinances, distribution maintenance records and information pertaining to installation dates or materials for all services lines. This information must be verified below.

I HEREBY CERTIFY THAT THE FOLLOWING METHOD(S) WERE USED TO DETERMINE NO LEAD SERVICE LINES EXIST IN THIS WATER SYSTEM'S DISTRIBUTION SYSTEM, AS REQUIRED BY ORC 6109.121(F):

LEAD SERVICE LINE VERIFICATION

This PWS states they have no lead service lines and has reviewed the following information (select one or more of the following):

- ☐ Historical permit records and/or local ordinances
- ☒ Distribution maintenance records (i.e. meter replacement, waterline break repairs)
- ☐ Information pertaining to installation dates for all service lines (i.e. after 1986 when lead services lines were banned)
- ☐ Service line material of all service lines is known (i.e. all service lines are known to be PVC)

Malta Village Water System
PWS ID: OH5800412

Malta Village PWS was initiated approximately 1903. From 1980-2007 the initiative was taken by the street foreman and the Village Administrator to replace all the service lines from the mains with plastic or copper. A lot was verified by the Village from 2011 to 2016 as we did 3 phases of sanitary sewer within the Village. We did not come into contact with any lead water line services while installing the sanitary sewer. However, there still the possibility a lead service line may be in use. At the present moment, we have sent out surveys requesting our customers feedback on what type of material used for their service line and indoor plumbing of their residence. We are mapping and documenting this information as we receive it back.

Please find attached with this document our spread sheet for our lead and copper sample sites, which we have already returned to Michael Deal of the Ohio EPA, January 24, 2017.

We have also attached our PWS map distribution lines within the Village, these are detailed by sections, and to the best of our knowledge are accurate.

Sincerely,

A handwritten signature in blue ink, appearing to read "Greg Hill".
