

RE: Aqua Ohio – Mansfield System 5
Report
Drinking Water Program
Richland County
PWS ID: OH7004912

MAR 06 2017

DDAGW - NWDO

**VERIFICATION FORM FOR COMMUNITY PUBLIC WATER SYSTEMS
CLAIMING NO LEAD SERVICE LINES**

The owner or operator of all community public water systems must identify and map areas of their distribution system that are known or are likely to contain lead service lines. Systems must submit a copy of the applicable map to the Ohio Department of Health and the Ohio Department of Job and Family Services. Systems must also submit a report to the director containing at least both of the following: (1) The applicable map with narrative, and (2) A list of sampling locations used to collect samples as required by Ohio Revised Code (ORC) Section 6109.121 and any rules adopted thereunder, including contact information for the owner and occupant of each sampling site.

Should a water system determine no lead service lines exist in their distribution system, they must provide information stating they reviewed, at the minimum, historical permit records and local ordinances, distribution maintenance records and information pertaining to installation dates or materials for all services lines. This information must be verified below.

I HEREBY CERTIFY THAT THE FOLLOWING METHOD(S) WERE USED TO DETERMINE NO LEAD SERVICE LINES EXIST IN THIS WATER SYSTEM'S DISTRIBUTION SYSTEM, AS REQUIRED BY ORC 6109.121(F):

LEAD SERVICE LINE VERIFICATION	
This PWS states they have no lead service lines and has reviewed the following information (select one or more of the following):	
<input checked="" type="checkbox"/>	Historical permit records and/or local ordinances
<input checked="" type="checkbox"/>	Distribution maintenance records (i.e. meter replacement, waterline break repairs)
<input type="checkbox"/>	Information pertaining to installation dates for all service lines (i.e. after 1986 when lead services lines were banned)
<input type="checkbox"/>	Service line material of all service lines is known (i.e. all service lines are known to be PVC)

There are no known Aqua or customer lead
water service lines in this Public Water System*

*This map was compiled solely for the purpose of complying with ORC Rev. 6109.121(F) which
in part requires water utility companies to identify and map every of the water system that are
known or likely to contain lead service lines owned by the water utility or its customers and
to identify characteristics of buildings served by the system that may contain lead piping, solder
or fittings. This map is based upon data compiled from available utility records, information
acquired during physical inspections of main/service lines and includes assumptions based
upon the dates in which service lines were installed or the age of the buildings receiving water
service. Aqua cannot guarantee the accuracy of all information and assumptions utilized to
compile this map, which was developed solely for the purpose noted above. This map should
not be utilized for any other purpose, commercial or otherwise. This map will be periodically
updated when sufficient additional records or information become available. Aqua reserves the
right to alter or amend the content of this map at any time. Each customer remains responsible
to independently verify whether the customer portion of the service line contains lead.

Buildings in Ohio built prior to 1998 or that use plumbing material or solder manufactured before
1998 may have materials with greater than 8% lead and are at a higher risk of contributing lead
to the drinking water than materials manufactured after 1998. In addition, buildings built and
plumbing materials manufactured after 2014 were required to have less than 0.25% lead by
weight and have the lowest risk for contributing lead to the drinking water. It should be noted
however that, although prohibited, some use of leaded solder or leaded components may
have occurred after the prohibitions became effective.
