

Dunfalls Association, Inc.

7017 MAR -7 AM 9:54

PWS6000303

P.O. Box 266

Duncan Falls, OH 43734

The Dunfalls Water System purchases all of the water consumed in its jurisdiction from the Muskingum County Water Department.

Dunfalls provides no alteration to the finished water procured from the county.

At the onset of the first draw monitoring program, the association acted to remove all lead goosenecks from the system. All service branches to the consumers are copper. The consumers utilize some galvanized iron, copper, and HDPE for their portion of the exterior and interior plumbing.

Homes selected for testing are picked with an honest attempt to find lead solder, and probable potential high lead fixtures. Homes with softeners are avoided.

One following this system map can readily discover the street addresses on the enclosed sampling record.
