re: Mapping Requirements

Division of Drinking and Ground Waters

Attached are the submittal requirements for the Lead mapping in Distribution including a map, narrative description and a list of sampling locations that are Tier I sites used to collect samples.

T King
Owner/Operator

Lead Mapping in Distribution Systems

Narrative: Service for main lines throughout the mobile home park consists of two-inch PVC piping. Stand pipe for each mobile home service line consists of a one-half inch by four foot copper with two soldered connections.
