Re: Brentwood Mobile Home Community
PWS ID: OH6300212
Paulding County

To Whom It May Concern:

Industrial Fluid Management has been contracted by M. Shapiro Real Estate Group Ohio, LLC, 31550 Northwestern Highway, Suite 220, Farmington Hills, MI 48334, to prepare and submit the required documentation and mapping set forth in the Ohio House Bill 512 for Brentwood Mobile Home Community 17859 US 127, Cecil, OH 45821, Paulding County, PWS ID: OH6300212.

All submitted information was translated from a plan approval through the Ohio Department of Health in 1973. The source maps are not As Built, but the plan stated the following;

*Water line pipe shall be Asbestos Cement Pressure Pipe, Class 150, conforming to AWWA C400-65;
Cast Iron Pipe, ASA thickness Class 22 with 1 mil cement water lining; or Polyvinyl Chloride Pipe, SDR
26 with pressure rating of 160 psi conforming to CS-256-63.*

It is unclear now which piping material the contractor went with, but lead piping was not specified in the approval. As per the dates stamped it was installed prior to 1998 and will be treated as such.

If you have any questions concerning this matter, please call 866-435-4436.

Sincerely,

Jammie Flores
Industrial Fluid Management, INC

DRAWING IS REPRESENTATION OF WATER AND SEWER LINES. DO NOT USE FOR BUILDING OR DIGGING. DRAWING IS REFERENCE ONLY.

Buildings in Ohio built prior to 1998 or that use plumbing material or solder manufactured before 1998 may have materials with greater than 8% lead and are at a higher risk of contributing lead to the drinking water than materials manufactured after 1998. In addition, buildings built and plumbing materials manufactured after 2014 were required to have less than 0.25% lead by weight and have the lowest risk for contributing lead to the drinking water. It should be noted however that, although prohibited, some use of leaded solder or leaded components may have occurred after the prohibitions became effective.
