OEPA

March 17th 2017

To whom it may concern,

This is a narrative for the Mapping of Leading Creek Conservancy District's water distribution system.

OEPA PWS # 5300012

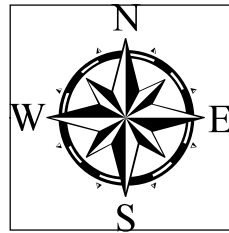

- Leading Creek Conservancy District does not have any lead service lines or lead plumbing in the water system. All service line material is PEP (Polyethylene Pipe) from main lines to service connections at the meter yokes.
- All meter setters and main line connections are 2014 and older which could possibly have a higher percentage of lead based solder.
- The connection on customer's side of the meter setter is undetermined because we do not have any record of customer's plumbing on file.
- The legend for the map will be in the mapping files labeled as LCCD SERVICE AREA MAP 1 and LCCD SERVICE AREA MAP 2.

If there are any questions on the map, narrative, or any other files, feel free to call Leading Creek Conservancy District at 1-740-742-2411 and we would be glad to answer any questions.

Sincerely,

Elbert Lee Williams Jr, Operator on Record, LCCD
