

Village of Rutland
100 East Second Street,
Suite 301 Pomeroy, OH 45769

OEPA

March 17th 2017

To whom it may concern,

This is a narrative for the Village of Rutland's mapping of their water distribution system.

OEPA PWS # 5300403

- The Village of Rutland does not have any Lead service lines or Lead plumbing in their water system. All service connection from the main lines to the meter connection are PE or Copper tubing.
- All main line connections and meter setters are dated 2014 and older which may contain a higher percentage of Lead based solder.
- The plumbing material type from the meter setter to the homes are unknown due to no information on file of customer's plumbing.
- The legend for the map will be in the mapping files labeled RUTLAND SERVICE AREA MAP 1, and RUTLAND SERVICE AREA MAP 2.

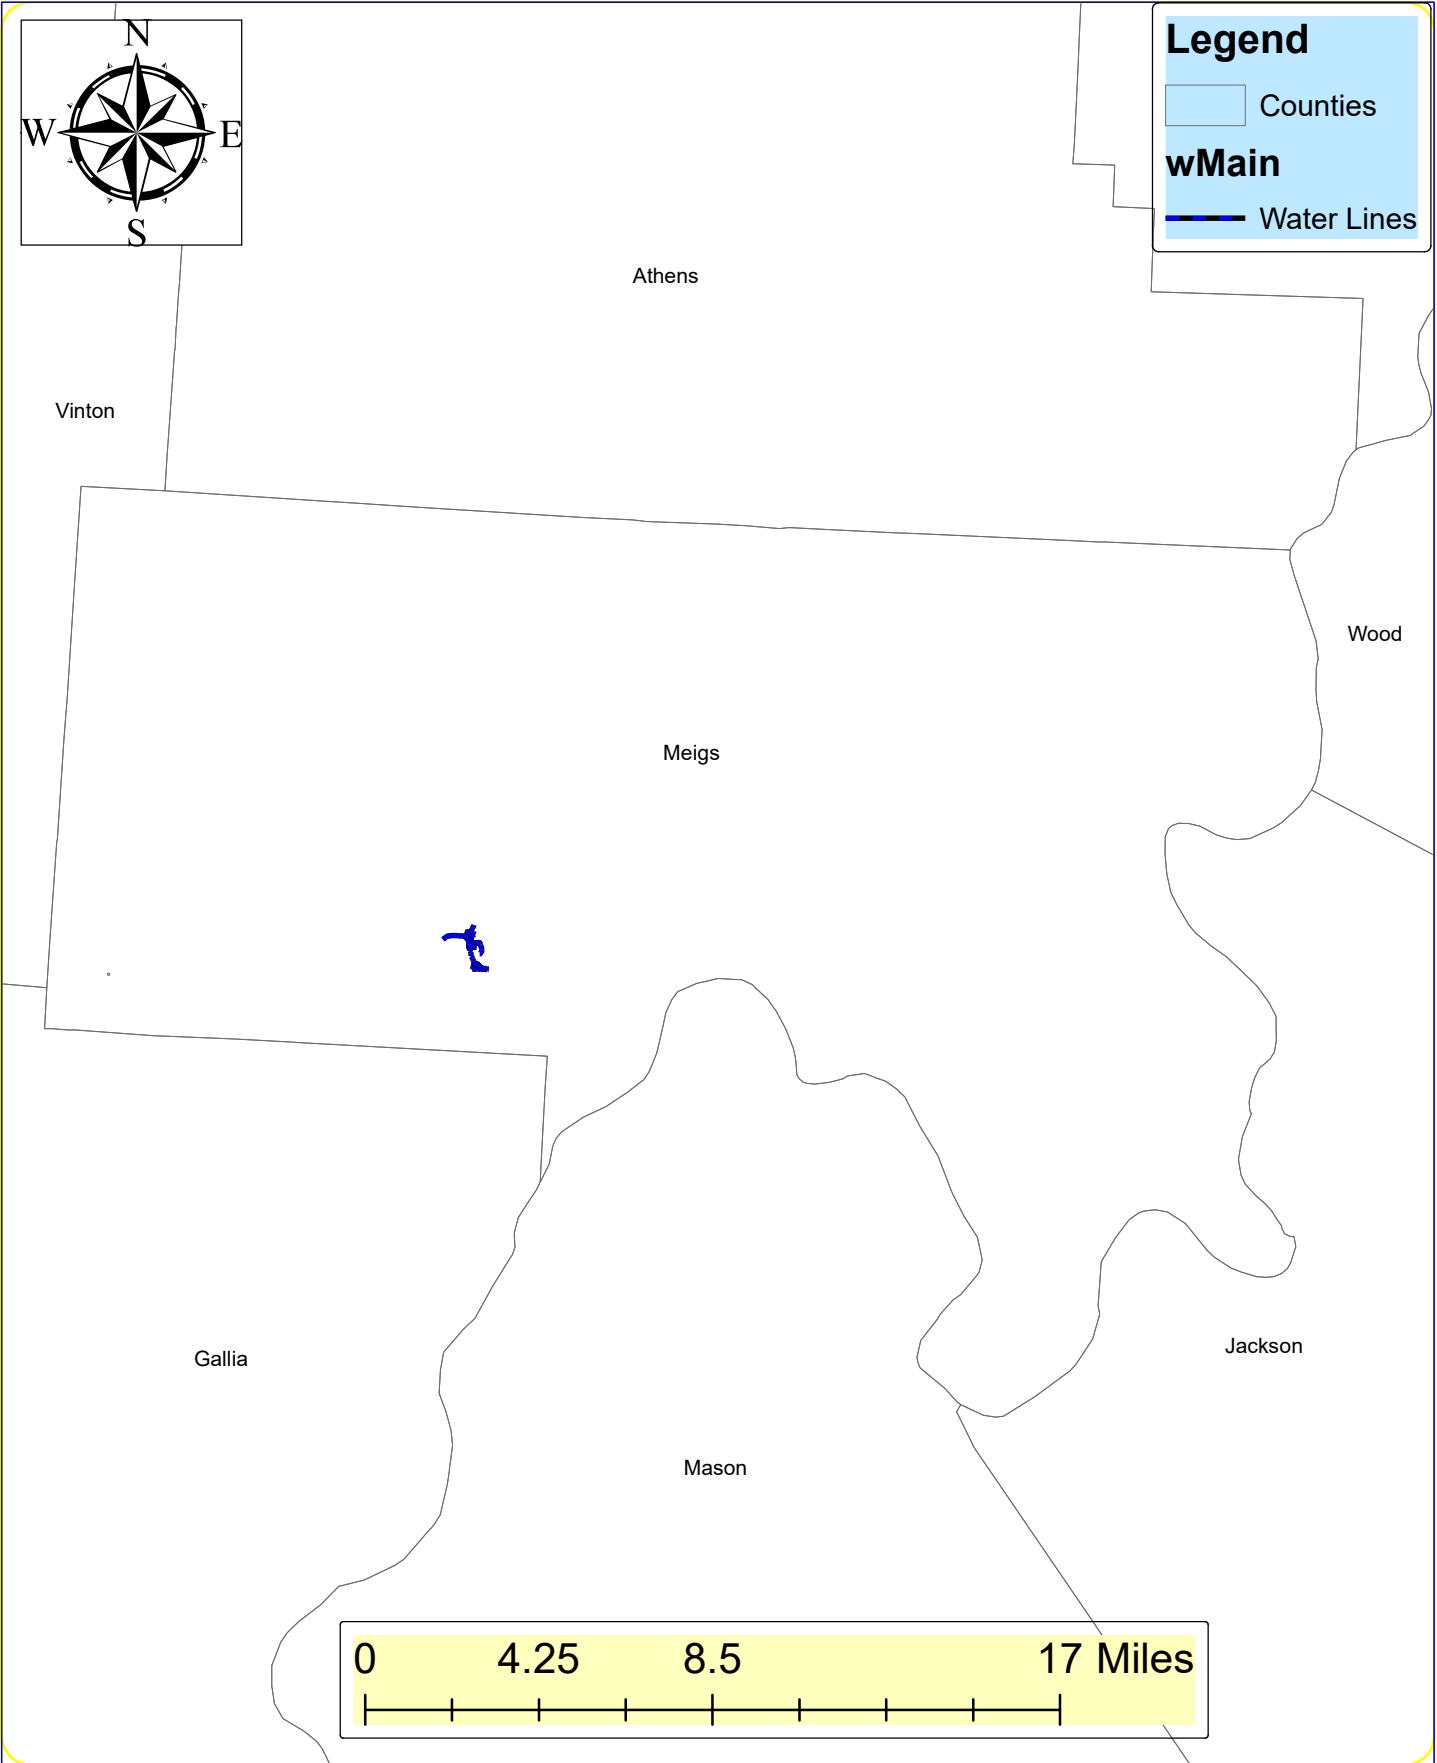

If there is any question on the map, narrative, or any other files feel free to call the Meigs County Commissioners at 1-740-992-2895 or Elbert Lee Williams Jr at 1-740-742-2091 or 1-740-856-8415 and we would be glad to answer any questions.

Sincerely,

Elbert Lee Williams, Operator of Record
