

RE: PWS ID #OH6042912

THE WILDS

14000 International Road

Cumberland OH 43701

To Whom it May Concern,

We have reviewed all available building plans, documents and materials available to us and believe to the best of our knowledge that no lead service lines were installed here at The Wilds. The first building constructed was the Johnson Center building, which was built in 1989 and followed the abolishment of lead service lines being used after 1986. In addition, all service lines are verified to be schedule 80 PVC.

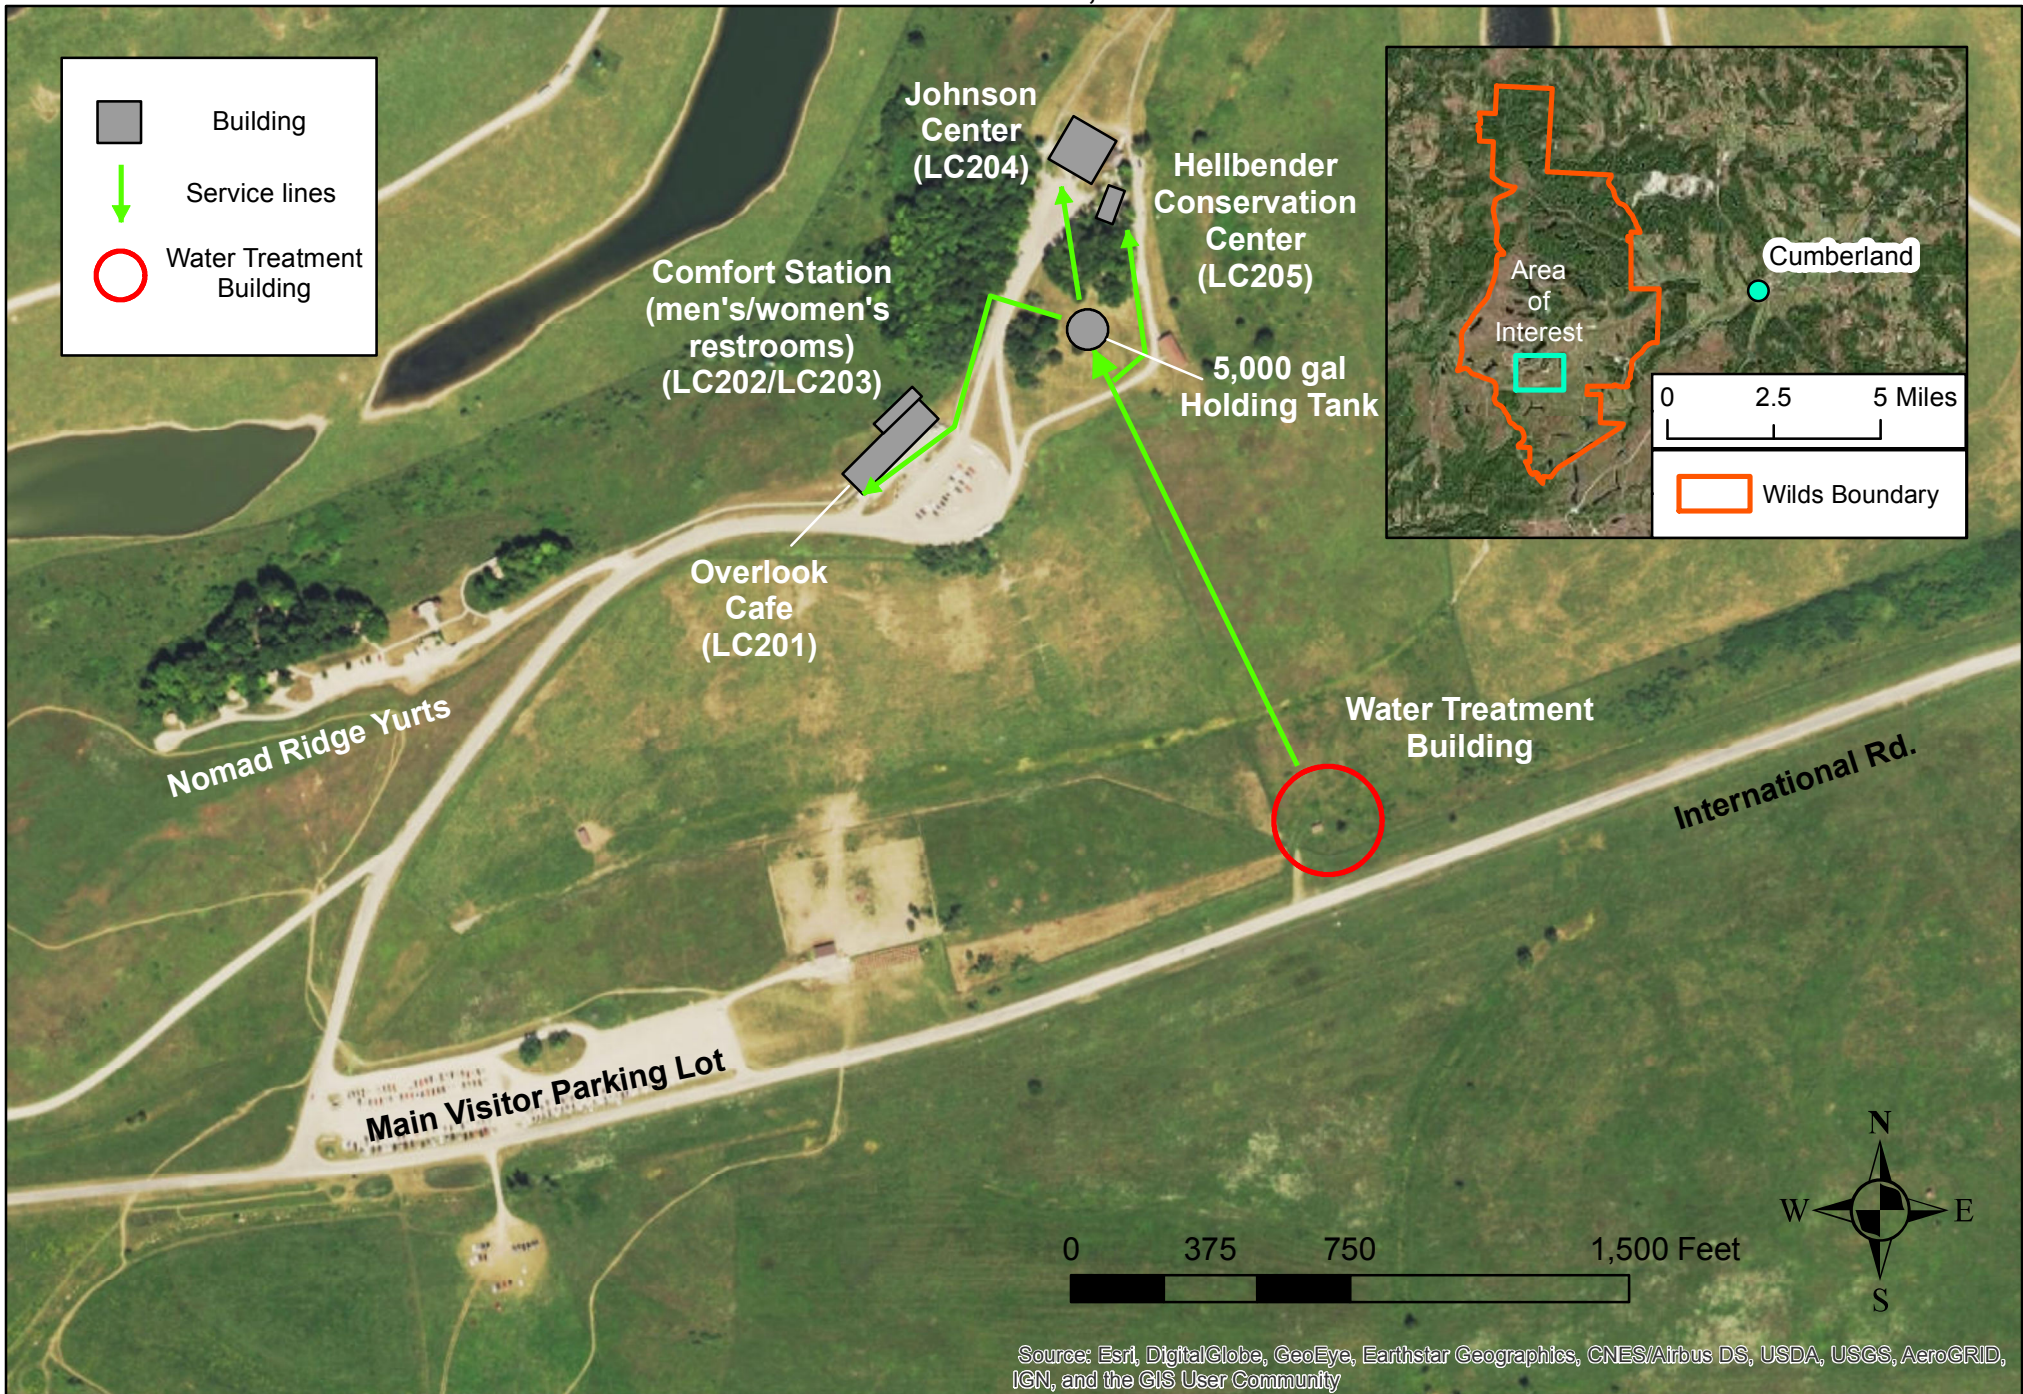

If there should be any further questions, please feel free to contact John Campbell, Director of Facilities here at The Wilds at jcampbell@thewilds.org or 740.638.5030 ext. 2473.

Thank you,

John Campbell
