

WAYNOKA REGIONAL WATER AND SEWER DISTRICT

1 Waynoka Drive Sardinia, OH 45171 Phone : (937) - 446 - 3256 Fax : (937) - 446 - 2064

Ohio EPA - SWDO 401 E. Fifth Street Dayton, Oh 45402

Lead & Copper Monitoring Narrative for PWSID OH0800811:

Waynoka Regional Water contains 791 consumer water connections for potable water consumption. Of the 791 connections none of them contain lead service lines. Prior to 1999 Waynoka did not contain water meters. During 1999 and 2000 all customer connections were excavated and visibly viewed by district personal and a new water setter and meter were installed. All but a few were constructed of polyethylene pipe with a handful being copper.

In a continued meter project Waynoka began changing all of the existing meters in 2016. At this point approximately 765 meters have been changed to the less than 0.25% lead component material meter. The remainder will be installed in the next few days and weeks weather permitting.

Although the Waynoka distribution system does not contain any lead transmission lines nor any lead service lines, any structures built before 2014 may be constructed with plumbing material containing lead solder or fixtures containing lead.

Waynoka also supplies water to a private campground that is shown on the lead map. In what's called the old campground all water spigots are labeled non potable, the bath house and bathrooms have been renovated in the last two years with new fixtures. In what's considered the new campground addition all water lines are PVC with polyethylene pipe feeding the connections to the campers.

In addition Waynoka Property Owners Association prohibits commercial property. There are no schools or nursing facilities in the confines of Lake Waynoka. Waynoka Regional Water & Sewer District only supplies water in the boundaries of Lake Waynoka.

If any further information is needed feel free to contact me.

Respectfully

George Culver Superintendent of Utilities Waynoka Regional Water & Sewer District

VERIFICATION FORM FOR COMMUNITY PUBLIC WATER SYSTEMS CLAIMING NO LEAD SERVICE LINES

The owner or operator of all community public water systems must identify and map areas of their distribution system that are known or are likely to contain lead service lines. Systems must submit a copy of the applicable map to the Ohio Department of Health and the Ohio Department of Job and Family Services. Systems must also submit a report to the director containing at least both of the following: (1) The applicable map with narrative, and (2) A list of sampling locations used to collect samples as required by Ohio Revised Code (ORC) Section 6109.121 and any rules adopted thereunder, including contact information for the owner and occupant of each sampling site.

Should a water system determine no lead service lines exist in their distribution system, they must provide information stating they reviewed, at the minimum, historical permit records and local ordinances, distribution maintenance records and information pertaining to installation dates or materials for all services lines. This information must be verified below.

I HEREBY CERTIFY THAT THE FOLLOWING METHOD(S) WERE USED TO DETERMINE NO LEAD SERVICE LINES EXIST IN THIS WATER SYSTEM'S DISTRIBUTION SYSTEM, AS REQUIRED BY ORC 6109.121(F):

LEAD SERVICE LINE VERIFIC	ATION	
This PWS states they have no lead service reviewed the following information (select of following):	ines and has one or more of t	he
 Historical permit records and/or local or Distribution maintenance records (i.e. mwaterline break repairs) Information pertaining to installation dat (i.e. after 1986 when lead services lines) 	eter replacemen es for all service were banned)	lines
 Service line material of all service lines service lines are known to be PVC) 		
service lines are known to be PVC)	PWS NAME	: <u>Waynoka Regiona</u>
service lines are known to be PVC)		: <u>Waynoka Regiona</u> OH0800811
