March 7, 2017

To whom it may concern,

The Village of Whitehouse water distribution system (OH4801612) is a community water system comprised of a mixture of properties; residential, commercial and industrial.

Some of these properties were constructed prior to the Safe Drinking Water Act (SWDA) amendment of 1986 which ban the use of lead solders which contain more than 0.2% lead. The lead ban provisions of the act became effective in Ohio Plumbing Code on March 30, 1998.

Buildings in Ohio built prior to 1998 or that use plumbing material or solder manufactured before 1998 may have materials with greater than 8% lead and are at a higher risk of contributing lead to the drinking water than materials manufactured after 1998. In addition, buildings built and plumbing materials manufactured after 2014 were required to have less than 0.25% lead by weight and have the lowest risk for contributing lead to the drinking water. It should be noted however that, although prohibited, some use of leaded solder or leaded components may have occurred after the prohibitions became effective.

The attached map is a representation of the properties in the Village of Whitehouse and properties outside of the Village of Whitehouse corporation limits served by The Village of Whitehouse water distribution system which may contain plumbing fixtures or solder materials with lead content.

Respectfully,

Steven P. Pilcher
Director of Public Service
Village of Whitehouse
