

Ohio EPA mapping and spreadsheet information for Ohio House Bill 512 requirements

Howes Hens Non Transient Non Community Class A drinking water system

PWS ID OH 1950618

Facility ID 1962395

This site is located at 13242 Cochran Rd. Rossburg Ohio 45362 in Darke County.

In 2015 an expansion included a break room and drinking water system for the employees. At that time a new water system was installed and permitted. It includes receiving water in the well building (see attached map) water softening goes on there and then it is pumped to the break room through all pvc water lines. Inside the janitor room between the restrooms is a water heater. From there the water is distributed through PEX water lines to the sink, the restrooms and the handwash sinks (sample locations DS 000-1, DS 000-2, DS 000-3, DS 000-4, DS 000-5). These five locations we sample the water for lead and copper according to our permit. There is no lead used in the piping. Any copper fittings are soldered with 95/5 lead free solder.

The site is all new plumbing since 2015.

Any questions feel free to contact Bill Knapke 419-852-8506
