Dorothy Love Retirement community

Dorothy Love Retirement Community is located at the intersection of Cisco Rd and Kuther Rd. in the city of Sidney, Ohio in rural Shelby County. The campus consists of multiple buildings that are used for Senior Living. We have our Main Building that is used as Skilled Nursing care /Rehab and Assisted living units. We also have 56 cottages and a 72 unit apartment building that serves as housing for those in an independent setting. Water service lines are constructed of a ductile iron material branching to galvanized piping in our skilled areas then to copper serving each room. In all other instances we service through the ductile iron branching to copper lines into our cottages and apartment units. Our A/B/C/D wings were constructed in 1974 and E-wing done in 1983. The Administration building was completed in 1982 and the Apartment building followed in 1988. The cottage construction began somewhere around 1977 and continued through 2006. The Amos Center was completed in 1992 and our Chapel addition wrapped up in 2000.

Note: Because it is practically impossible to determine the lead content of an installed fixture, fitting or pipe, it should be assumed that the manufacturer or installation date is the primary indicator of the lead content. Therefore, the characteristics of building and piping solder or fixtures would be building in Ohio built prior to 1998 or that the used plumbing material or solder manufactured before 1998 may have materials with greater than 8% lead and are at a higher risk of contributing lead to the drinking water than materials manufactured after 1998. In addition, building built and plumbing material manufactured after 2014 were required to have less than .25% lead by weight and have the lowest risk for contributing lead to the drinking water. It should be noted however that, although prohibited, some use of leaded solder or leaded components may have occurred after the prohibitions became effective.

VERIFICATION FORM FOR COMMUNITY PUBLIC WATER SYSTEMS CLAIMING NO LEAD SERVICE LINES

The owner or operator of all community public water systems must identify and map areas of their distribution system that are known or are likely to contain lead service lines. Systems must submit a copy of the applicable map to the Ohio Department of Health and the Ohio Department of Job and Family Services. Systems must also submit a report to the director containing at least both of the following: (1) The applicable map with narrative, and (2) A list of sampling locations used to collect samples as required by Ohio Revised Code (ORC) Section 6109.121 and any rules adopted thereunder, including contact information for the owner and occupant of each sampling site.

Should a water system determine no lead service lines exist in their distribution system, they must provide information stating they reviewed, at the minimum, historical permit records and local ordinances, distribution maintenance records and information pertaining to installation dates or materials for all services lines. This information must be verified below.

I HEREBY CERTIFY THAT THE FOLLOWING METHOD(S) WERE USED TO DETERMINE NO LEAD SERVICE LINES EXIST IN THIS WATER SYSTEM'S DISTRIBUTION SYSTEM, AS REQUIRED BY ORC 6109.121(F):

LEAD SERVICE LINE VERIFICATION This PWS states they have no lead service lines and has reviewed the following information (select one or more of the following): □ Historical permit records and/or local ordinances Distribution maintenance records (i.e. meter replacement, waterline break repairs) □ Information pertaining to installation dates for all service lines (i.e. after 1986 when lead services lines were banned) □ Service line material of all service lines is known (i.e. all service lines are known to be PVC) PWS NAME: DOROTHY LOVE Signatúre of Responsible Person Date PWS ID: EULY FOSTER - DIRECTOR OF MAINTENANCE COUNTY: SHEZBY

Printed Name and Title of Responsible Person
