RE: *Lead Program - Mapping & Other Information Requirements*

Dear Sir or Madam,

Enclosed please find a map of North Pine Estates' water system and lines, which is based on information to the best of our knowledge.

The key in the map should be self-explanatory and includes color-coded information on the service lines, which are 2" PVC plastic up to the individual homes for which, we do not have information. No auxilliary buildings are serviced by the water system. Additionally, the map is color coded to show the various sampling locations as part of our SMP ID Project (lots 2, 12, 17, 20 & 28). Our SMP ID Project spreadsheet is enclosed with this Letter.

We do not have official drawings of our system as they were not available through the prior owner and we have been unsuccessful in obtaining them through any local, regional or state resources. The current water system (well) was put into production in April of 2015 and new lines were run to lots 28 and 29 using 2" PVC to match the remainder of the Park. Enclosed are repair invoices from our Contractor showing details on the material of the lines.

We believe this delivers all of the required information under the Lead Service Line and Mapping Project. Should you have any questions or need further information, please don't hesitate to contact us.

Best regards,

Craig M. Herschel
