

APR 25, 2017

Village of Laurelville

RECEIVED

In 2016 The Village of Laurelville went to a fixed based meter reading system. During this process all meters were replaced and at that time all service lines were inspected and to be lead free. The Village of Laurelville does not know the plumbing of all the buildings in its Distribution System.

Buildings in Ohio built prior to 1998 or that use plumbing material or solder manufactured before 1998 may have materials with greater than 8% lead and are at a higher risk of contributing lead to the drinking water than materials manufactured after 1998. In addition, buildings built and plumbing materials manufactured after 2014 were required to have less than 0.25% lead by weight and have the lowest risk for contributing lead to the drinking water. It should be noted however that, although prohibited, some use of leaded solder or leaded components may have occurred after the prohibition became effective.

Please call if you have any questions

Ronald E. Stephens
