RE: Lead Plumbing and Fixtures Mapping Requirements
Austin Powder Company

To Whomever It May Concern,

In accordance with 6109.121 of the Ohio Revised Code (ORC), the Austin Powder Company has identified and mapped the areas within the distribution system that are known or likely known to contain lead service lines. The Austin Powder Company is notifying the Ohio EPA that a change has been made to the facility's Main System (OH8230412) SMP ID spreadsheet, and Lead and Copper Map. Sampling location LC206 PETN Breakroom was added to replace sampling location LC204 Fuse Line Breakroom. The Fuse Line Breakroom was decommissioned and demolished, and therefore, will no longer be in service. Please note that LC206 will be utilized in the next Lead and Copper Sampling event. The updated SMP ID spreadsheet and the Lead and Copper Map are attached to this submittal for your review and approval.

If you have any questions or concerns please feel free to contact me using the information provided below.

Thank You,
