RE: AVON LAKE POWER PLANT
COMPLIANCE NOTIFICATION
AIR PERMIT
LORAIN COUNTY
DAPC FACILITY ID # 0247030013
DIVISION OF AIR POLLUTION CONTROL

Mr. Scott Cameron
Senior Air Quality Specialist
33570 Lake Rd.
Avon Lake, OH 44012

Dear Mr. Cameron:

Ohio EPA has reviewed the compliance stack test report, received on July 29, 2019 for the Avon Lake Power Plant in Avon Lake, Ohio, for emissions unit B012 (unit #9). The test was conducted to determine compliance with the applicable permitted level of particulate emissions (PE), as a surrogate for non-mercury metals for the 2nd quarter 2019 testing requirement of the (Mercury Air Toxics Standard) (MATS). The test was conducted on June 28, 2019.

The testing was reported to have been performed per the submitted protocol and utilized the required testing methodologies. The test report indicated that the average mass emission rate for all pollutants successfully demonstrated compliance as shown in the table below:

Avon Lake Power Plant-Avon Lake, OH			Test Date: 6/28/19
Unit	Parameter	Permit Limits	Test Results
Unit #9 (B012)	PE	0.015 lb/MMBtu*	0.004 lb/MMBtu
	Load	665 MW	647.6 mw

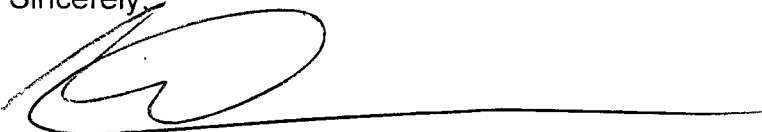

*Low Emitting Electric Generating Units limits reflected in the table

Avon Lake power plant has been performing quarterly particulate emissions tests for the unit # 9 for the last 12 operating quarters per the requirements of 40 CFR. Part 63. Subpart UUUUU, which allows a facility to achieve "LEE Status" (Low Emitting Electric Gen. Unit). Avon Lake power plant has achieved the LEE status and is now required to test within 3 calendar years of the last compliant test to maintain LEE. No further quarterly tests are required at this time.

MR. SCOTT CAMERON
AVON LAKE POWERPLANT
