C&DD Program**

Dear Dr. Roberts:

On March 23, 2021, the Ohio Environmental Protection Agency (Ohio EPA) completed its annual survey of your health district regarding your Solid and Infectious Waste Programs and Construction and Demolition Debris Program in accordance with Ohio Administrative Code (OAC) Rule 3745-37-08. The annual survey included the time period between November 22, 2019 and November 21, 2020.

Upon review of the survey findings, I have determined that Columbus Public Health is in substantial compliance and I hereby place Columbus Public Health on my approved lists of health districts authorized to administer and enforce the solid and infectious waste and construction and demolition debris laws and rules in accordance with Sections 3734.08 and 3714.09 of the Ohio Revised Code.

Additionally, you are hereby notified that this action of the Director is final and may be appealed to the Environmental Review Appeals Commission pursuant to ORC Section 3745.04. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00 made payable to "Treasurer, State of Ohio." The Commission, in its discretion, may reduce the fee if by affidavit it is demonstrated that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission  
30 East Broad Street, 4th floor  
Columbus, Ohio 43215

I consider our agencies regulatory partners and appreciate the efforts of your dedicated staff. I recognize the extraordinary role your agency has played in addressing the COVID-19 pandemic, and the challenge this incredible response may have had on health district staffing and implementation of your Solid and Infectious Waste and Construction and Demolition Debris programs. If at any time Ohio EPA can provide assistance to support these programs, please encourage your staff to contact Ohio EPA's Central District Office.

Enclosed please find a copy of the annual survey evaluation report for your health district, which includes an assessment of administrative activities. Please note that this annual survey evaluation has been modified due to the COVID-19 pandemic, which may have adjusted the survey period and the conventional scope of file review and field inspections. Ohio EPA hopes to resume the normal evaluation procedure for future annual surveys. If you have questions or comments regarding the manner in which our agencies administer these programs, please contact me or Vlad Cica, Chief of the Division of Materials and Waste Management.

If you have any questions concerning this letter, please contact Matt Boyer of Ohio EPA's Central District Office by telephone at (614) 779-0099 or by email at [matthew.boyer@epa.ohio.gov](mailto:matthew.boyer@epa.ohio.gov).

Sincerely,

Laurie A. Stevenson  
Director

Each health district staff person possesses either a registered sanitarian/sanitarian-in-training certificate, the equivalent educational background required, or two years adequate work experience inspecting waste facilities.						
<b>OAC Rule 3745-37-08(D)(12)</b>				<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The health district maintains a file of information relating to each exemption and license special term/condition. The file includes a copy of each exemption order issued and each license issued that contains special terms and/or conditions, as well as the health district's written justification for each action.						

**OAC Rule 3745-37-08(C)(8) and (D)(7):**

During the review of the records, Ohio EPA determined that the health district properly cited violations when conditions at the regulated facilities warranted them to be issued. The health district also conducted additional focused inspections in response to complaints received about the regulated facilities. Open dumping complaints are routed to the City of Columbus' 311 call center and are either investigated by code enforcement officers or routed for law enforcement follow-up, if warranted.

**OAC Rule 3745-37-08(C)(9) and (D)(8):**

The health district has an expedited process to refer cases if needed and takes appropriate actions against persons whenever necessary to bring about substantial compliance with Chapter 3734. and

3714. of the Ohio Revised Code (ORC) and the rules adopted thereunder. No incidents of “serious hazards to the public health” were identified during the survey period.

### Inspection Summary

*The health district was able to perform all required inspections in a timely manner.*

### Solid and Infectious Waste Programs Summary

Ohio EPA would like to thank the health district for their continued dedication to the solid and infectious waste programs during these unprecedented times. The Agency recognizes the tremendous

strain that the COVID-19 pandemic has had on the health district staff and we commend them for the outstanding work they did.

The health district conducts all required comprehensive inspections at licensed and registered facilities within its jurisdiction to ensure compliance with the solid and infectious waste regulations. Additionally, I observed no deficiencies during the administrative review of the annual survey. The health district appropriately documents violations with a comprehensive NOV to the owner/operator detailing any violations, including rule citations and any additional information from the inspection. The health district requests a response from the facility on actions taken to remedy or prevent the violation from re-occurring and conducts re-inspections at facilities if violations are noted to ensure that compliance is achieved. The health district effectively manages solid waste complaints and has procedures in place to escalate enforcement if necessary.

It is the role of Ohio EPA to provide oversight and education to the health district in each of the programs outlined in this letter. The health district's ability to recognize, identify and cite violations in all program areas, as well as familiarity with the regulations during all types of inspections is critical to complete thorough site evaluations and enforcement of the regulations. The health district staff periodically called or emailed Ohio EPA's staff for technical assistance within the program areas. They also requested training throughout the annual survey period. Ohio EPA will continue to conduct peer reviews of inspection letters and provide technical assistance to the health district, as necessary.

#### **Construction and Demolition Debris Program Summary**

The health department shows proficiency with the construction and demolition debris (C&DD) rules and maintains open communication with Ohio EPA. The health department responds to C&DD complaints and cites violations, as needed.

#### **Post-Survey Conference**

On March 23, 2021, I held a virtual post-survey conference with Scott Whittaker, Section Chief, Adam Holbrook, Program Supervisor, and Sarah Badenhop, Sanitarian Program Coordinator, to summarize the annual survey findings. During the post-survey conference, we discussed the health district's compliance with ORC Sections 3734.08 and 3714.09. Additionally, I shared my intention to recommend to you the health district remain on the approved lists.

*This Annual Survey Evaluation Report (Report) is for internal use to perform a preliminary assessment of approved health districts. It is not to be used as an indication of a health district's overall compliance with OAC Rule 3745-37-08, which is a determination of the director of Ohio EPA. This Report and any accompanying information will be forwarded to the director for consideration and to determine substantial compliance with Rule 3745-37-08 of the Administrative Code.*
