

Ohio EPA - Division of Surface Water
Class B Beneficial Use Site Re-Certification

Ohio Administrative Code (OAC) 3745-40-06(F) requires the permittee to certify that prior to beneficial use, each authorized beneficial use site was evaluated for changes at or near the beneficial use site that may affect site restrictions.

If changes have occurred at or near the beneficial use site, the permittee shall comply with all applicable site restrictions in OAC 3745-40.

Treatment Works: Lucas County WRRF	NPDES Permit #: 2PK00000*MD

Other:	<input type="checkbox"/>

Ohio EPA - Division of Surface Water
Class B Beneficial Use Site Re-Certification

Certification Statement

1. I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.
2. I have read and understand Chapter 3745-40 of the Ohio Administrative Code (OAC) and I agree to beneficially use biosolids in accordance with all applicable beneficial use requirements and restrictions established in OAC 3745-40.
3. Any changes that were found at the site require the need to adhere to additional site restrictions, but do not affect the site's overall suitability for the beneficial use of biosolids.
4. I agree to maintain all applicable records required by OAC 3745-40.

Title

Andy

Division of Surface Water
Application for Authorization: Class B Beneficial Use Sites

Owner Consent for Beneficial Use

Beneficial use site owner ¹ : <u>Andy Heer</u>		
Mailing address: <u>7381 Co Rd 23</u>		
City: <u>Archbold</u>	State: <u>OH</u>	Zip: <u>43502</u>
Telephone number: <u>419-966-5196</u>		
Email address:		

Certification Statement

1. I agree to allow biosolids generated by the treatment plant identified on Form BUA-1 to be beneficially used on my property at agronomic rates.
2. I agree to allow federal, state and local regulatory staff access to the beneficial use site for the purposes of inspecting and authorizing the beneficial use site, beneficially using biosolids, and collecting and analyzing samples from the beneficial use site. I reserve the right to ask the above parties for proper identification at any time.
3. I certify that I am holder of legal title to the property described on application form BUA-5, or am authorized by the holder to give consent for the land application of biosolids, and that there are no restrictions to the granting of consent under this form.

Sludge Site Review

February 10, 2005

Mr. Tom Vanden Eynden
Maumee River Wastewater Treatment Plant
5758 North River Road
Waterville, Ohio 43566

Dear Mr. Vanden Eynden:

On December 2, 2004, site inspections were made for land application of municipal sludge in Fulton County from the Maumee River Wastewater Treatment Plant. Our findings and recommendations for the sites are as follows:

OEPA Site #: 26-00043 (Aeschliman C(N)/108(W)) - This 41 acre site owned by Howard Moll is located on the north side of County Road C, approximately 1/2 mile west of State Route 108, Section 35, Clinton Township. The major soil types at the site are Hoytville clay loam, Nappanee loam, and Haskins loam. Soil analytical results indicate a pH value of 7.0 and a Cation Exchange Capacity (CEC) of 23.8 meq/100g. Proper isolation distances must be maintained from the two houses on County Road C.

OEPA Site #: 26-00044 (Aeschliman C(S)/108(W)) - This 27 acre site owned by Howard Moll is located on the south side of County Road C, approximately 1/3 mile west of State Route 108, Section 2, Clinton Township. The major soil types at the site are Hoytville clay loam, Nappanee loam, and Haskins loam. Soil analytical results indicate a pH value of 7.3 and a Cation Exchange Capacity (CEC) of 9.1 meq/100g. Proper isolation distances must be maintained from the three houses on County Road C.

OEPA Site #: 26-00045 (Aeschliman 108(W)/C(N)) - This 59 acre site owned by Dail Stutzman is located on the west side of State Route 108, approximately 1/3 mile north of County Road C, Section 35, Clinton Township. The major soil types at the site are Hoytville clay loam, Nappanee loam, and Haskins loam. Soil analytical results indicate a pH value of 6.2 and a Cation Exchange Capacity (CEC) of 10.7 meq/100g. Proper isolation distances must be maintained from the two occupied buildings on State Route 108.

OEPA Site #: 26-00046 (Heer L(S)/66(E)) - This 32 acre site owned by Andy Heer is located on the south side of County Road L, approximately 1/3 mile east of State Route 66, Section 8, Franklin Township. The major soil types at the site are Mermill loam, Haskins loam, and Del Ray silt loam. Soil analytical results indicate a pH value of 6.0 and a Cation Exchange Capacity (CEC) of 11.4 meq/100g. Proper isolation distances must be maintained from the three houses on County Road L. Sludge is not to be applied to land that is flooded. If sludge is applied to flood prone areas, it must be injected or immediately incorporated during periods when flooding is expected.

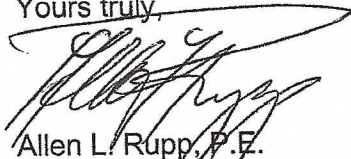

Mr. Tom Vanden Eynden
February 10, 2005
Page Two

OEPA Site #: 26-00047 (Heer JK(NW)) - This 40 acre site owned by Andy Heer is located to the northwest of the dead end of County Road JK, Section 32, Franklin Township. The major soil types at the site are Lenawee silty clay loam, Millgrove, and Del Ray silt loam. Soil analytical results indicate a pH value of 6.0 and a Cation Exchange Capacity (CEC) of 11.4 meq/100g. The proper isolation distances must be maintained from the house southwest of the site. Sludge is not to be applied to land that is flooded. If sludge is applied to flood prone areas, it must be injected or immediately incorporated during periods when flooding is expected.

These sites are acceptable for land application of municipal sludge from the Maumee River Wastewater Treatment Plant. Sludge is to be applied in compliance with the approved sludge management plan or NPDES permit in effect at the time of application and Chapter 3745-40 of the Ohio Administrative Code. Ohio EPA application procedures, isolation distances (homes, wells, waterways, etc.) must be strictly adhered to.

If you have questions, please refer to Ohio EPA's Sewage Sludge Rules in Chapter 3745-40 of the Ohio Administrative Code, or contact Megan Carr at (419) 373-3003.

Yours truly,

Allen L. Rupp, P.E.
