1.0 INTRODUCTION

Tetra Tech, Inc. (Tetra Tech) was tasked by the Ohio Environmental Protection Agency (Ohio EPA) Division of Environmental Response and Revitalization (DERR) Targeted Brownfield Assessment (TBA) Program to perform a Phase I Property Assessment (PA) of Mary Lou Patton Park (herein referred to as the Subject Property). The Subject Property (shown on Figures 1 and 2) is located at 405 Environmental Way, Chillicothe, Ohio. The Subject Property consists of a sub-portion of one parcel of land. The total size of the parcel is 25 acres; and also includes a municipal wastewater treatment plant (WWTP) located on the eastern end of the parcel. The Phase I Subject Property does not include any areas associated with the WWTP structures or operations. The Subject Property is currently owned by the City of Chillicothe.

This work was authorized under the Investigation and Mitigation of Solid and Hazardous Waste Sites Level-of-Effort (LOE) Contract CSP904622-7, Scope of Work and Cost Proposal (SWCP) TT26-11, authorized by Ohio EPA on June 15, 2026. Ohio EPA requested that the Phase I PA comply with Ohio EPA Voluntary Action Program (VAP), ASTM International (ASTM), and All Appropriate Inquiry (AAI) standards and guidelines.

Tetra Tech prepared this Phase I PA report for use by Ohio EPA to identify recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), and historical recognized environmental conditions (HRECs) as defined by ASTM. The Phase I PA was also completed to identify areas (IAs) where a release of hazardous substances or petroleum has or may have occurred on the Subject Property, as specified by Ohio VAP.

The Subject Property consists of a parking lot, green space, playground, storage sheds, and multiple baseball fields.

1.1 PURPOSE

The Phase I PA was performed in accordance with the Ohio VAP guidelines specified in Ohio Administrative Code (OAC) 3745-300-06, effective February 16, 2025, and AAI-compliant ASTM Standard for Phase I Environmental Site Assessments (ASTM E1527-21). The objective of the Phase I PA was to identify RECs, CRECs, and HRECs for the Subject Property (as defined by the ASTM Standard) and evaluate the potential presence of IAs (as defined by Ohio VAP guidelines). Subsurface investigations were not conducted as part of the Phase I PA.

The evaluation of the property and the information contained in this report are based on conditions existing on the date of the site reconnaissance. The evaluation was conducted only for the Subject Property, with limited visual observations of adjacent properties. To the extent feasible, this Phase I PA included an evaluation of past and present land uses at the Subject Property based on information available from various third-party resources during the conduct of the PA. Tetra Tech has based its conclusions and recommendations on the limited information available during the study. Tetra Tech does not and cannot represent that no RECs or latent conditions exist beyond those identified through examination of historical records, interviews, and observations at and near the Subject Property during this Phase I PA.

1.2 SCOPE OF SERVICES

The Phase I PA was performed in accordance with Ohio VAP and ASTM Standard E1527-21 guidelines to satisfy a contractual agreement between Ohio EPA and Tetra Tech. The Phase I PA was completed to identify, to the extent feasible, environmental conditions that indicate a release or potential release to or from the Subject Property or adjacent properties.

As defined by Ohio VAP guidelines, an IA is a location at the property where a release of petroleum or hazardous substances has or may have occurred. As defined by ASTM Standard E1527-21, a REC is the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. ASTM defines a CREC as a past release that has been addressed to the satisfaction of the applicable regulatory authority but is subject to some form of control, such as a property use restriction or engineering control; HRECs are past releases that have been addressed and meet unrestricted land use criteria with no controls required.

Tetra Tech completed the following activities under the scope of work:

- Site reconnaissance;
- Records review;
- Interviews; and,
- Report preparation.

The scope of the Phase I PA is intended to be thorough enough to determine whether an additional investigation, such as qualitative or quantitative investigations of contamination, would be prudent. However, the scope of work for the Phase I PA does not incorporate definitive subsurface sampling and analytical schemes.

As part of this Phase I PA, Tetra Tech did not evaluate the following non-ASTM Standard E1527-21 scope considerations: asbestos containing building materials; mold and radon; lead-based paint; determination of lead in drinking water; assessment for presence of wetlands; regulatory compliance; identification of cultural and historical resources; industrial hygiene; health and safety; assessment of ecological resources; presence of endangered species; indoor air quality; biological agents; and high-voltage power lines.

Additionally, Tetra Tech did not review business environmental risks or evaluate significantly lower purchase price, because these tasks are typically performed by the user. Tetra Tech also did not conduct a complete review of deeds for the adjacent properties.

1.3 LIMITATIONS AND EXCEPTIONS

This report is based on information supplied to Tetra Tech from outside sources and other available public records; as such, conclusions presented in this report are based solely on information Tetra Tech obtained for the Phase I PA. Tetra Tech makes no warranties regarding the accuracy of statements made by others that may be included in this report. Conclusions expressed in this study have been based strictly on the results of work conducted for this Phase I PA.

No conclusions based on work performed hereunder shall constitute or be represented as a legal opinion of any kind or nature but shall be a representation of findings from site visits and records examined. No warranties or guarantees expressed or implied are included within or intended by the report, except that the report has been prepared in accordance with the current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by professional consultants or firms performing the same or similar service.

Tetra Tech observed accessible areas of the Subject Property; however, Tetra Tech was unable to gain access into the on-property storage sheds at the time of the site reconnaissance; they were found to be locked and the City of Chillicothe staff accompanying Tetra Tech did not have the keys to grant access.

City staff informed Tetra Tech that they are used to store sports equipment and lawncare equipment. Changes in the condition of the Subject Property may occur with time due to either natural processes or human activities. The findings presented in this report are based on property conditions existing at the time of the site reconnaissance. This report was compiled for the sole use by the Ohio EPA and is not intended to be distributed or relied upon by third parties without written authorization from Tetra Tech.

1.4 DATES OF INVESTIGATION

The Phase I PA was initiated on June 15, 2026, and the site reconnaissance was completed on July 7, 2026.

2.0 SUBJECT PROPERTY DESCRIPTION

This section describes the Subject Property based on observations by Tetra Tech personnel during the site reconnaissance on July 7, 2026, as well as information provided or obtained from other resources during the conduct of the Phase I PA. The Subject Property is identified as a portion of one parcel of land, as described below within Table 1. The Subject Property is currently used for athletic fields and covers the western approximate 20-acre portion of the parcel. The parcel also includes the Chillicothe WWTP on the eastern portion, which is not a part of the Subject Property. Additional information gathered from the Ross County Auditor website is also included within Table 1.

Table 1 - Parcel Summary

Parcel No.	Owner	Address	Size (acres)	Land Use
305652026600	City of Chillicothe	405 Environmental Way	25	Park

The acreage described within Table 1 is that of the entire parcel on which the Subject Property is located, including the eastern adjacent wastewater treatment plant. If investigation activities are continued under the Ohio VAP, a plat map survey of the Subject Property that excludes the wastewater treatment plant should be completed during future work on the Subject Property.

2.1 LOCATION

The Subject Property is on a parcel listed within the Ross County Auditor property records with the address 405 Environmental Way, Chillicothe, Ohio. A copy of the Ross County Auditor property card information is provided in Appendix A. The location of the Subject Property is shown in Figure 1. The layout and surrounding properties are shown in Figure 2. Current and historical views of the Subject Property are also presented on various topographic maps and aerial photographs, as further discussed within Section 4.4 and in Appendix B.

2.2 PHYSICAL SETTING

The following sections summarize the Subject Property's physical setting, which includes topographic, geologic, and hydrogeologic setting information, as well as information pertaining to Drinking Water Source Protection Areas (DWSPA) and Sole Source Aquifers in the general vicinity of the Subject Property.

2.2.1 Topographic Setting

Tetra Tech reviewed the most recent U.S. Geological Survey (USGS) maps including the Chillicothe East 2023, 7.5-Minute Topographic Map provided by Environmental Data Resources, LLC (EDR) which are included in Appendix B. The Subject Property has a central elevation of approximately 607 feet above mean sea level (msl). The Subject Property's topography is relatively flat; surrounding topography is also relatively flat but slopes gently to the northeast toward the Scioto River, located approximately one quarter mile east-northeast of the Subject Property.

2.2.2 Soils and Surficial Geology

According to the EDR Radius Map Report (Appendix C), the dominant soil component in the area surrounding the Subject Property is identified as Warsaw loam, classified as a Class B hydrologic soil. Class B soils are moderately well and well-drained soils with moderately coarse textures. The Ohio

Department of Natural Resources (ODNR) interactive online geological map indicated that the Subject Property is in an area of intermediate level glacial outwash terraces from the late Wisconsinan age; these terraces comprise the surficial geologic materials in the area and overlie a deep Teays-age buried bedrock valley.

Available water well logs for the area viewed on the ODNR interactive on-line database indicate that uppermost geology in the area consists primarily of fine to coarse sand and gravel to depths of at least 75 feet below ground surface (bgs). The nearest well identified by ODNR is a monitoring well that has since been abandoned, located approximately 531 feet east-northeast of the Subject Property, installed in 1989 with a recorded total depth of 116 feet. The reported aquifer type is sand and gravel, and water was encountered during drilling at 24 feet. No wells are listed on the Subject Property. ODNR records include no borings or wells in the area that extend to bedrock; for this reason, the exact thickness of the unconsolidated materials is unknown.

2.2.3 Bedrock Geology

Tetra Tech reviewed the online ODNR Geology Interactive Map. Based on the ODNR map, the bedrock geology for the Subject Property and surrounding area consists of Devonian age Ohio and Olentangy Shales composed of carbonaceous shale with carbonate and siderite concretions. As previously discussed, the depth to bedrock in the area is unknown but is at least 116 feet based on nearby water well logs. The Ohio and Olentangy Shale bedrock is over 250 feet thick.

2.2.4 Hydrogeology

Tetra Tech reviewed the online ODNR Geology Interactive Map. According to the map, the Subject Property lies in an area of a buried valley aquifer following the Scioto River in which yields of 500 to 1,000 gallons per minute can be developed from sand and gravel deposits. This is consistent with the nearest water well log which reports saturated sand and gravel from 24 to 116 feet bgs.

In some areas of Ohio, it is not uncommon for water supply wells to draw from abandoned, water-filled subsurface coal mines, particularly in lower-yielding bedrock formations such as shales. Tech reviewed the online ODNR Interactive Mines of Ohio Map. Subsurface mines were not identified on or underlying the Subject Property.

Based on the regional topography, the local groundwater flow direction in the unconsolidated materials is estimated to be generally southeast; toward and in the downstream direction of the Scioto River and following the general direction of the buried valley. ODNR records for the area include no wells drilled into the bedrock and for this reason the occurrence and flow direction of groundwater in the bedrock are unknown.

2.2.5 Drinking Water Source Protection Areas

The City of Chillicothe obtains drinking water from water supply wells in a wellfield located approximately 1.6 miles northwest of the Subject Property. Tetra Tech reviewed Ohio EPA's electronic database for evaluation of DWSPAs relative to the location of the Subject Property. According to Ohio EPA DWSPA database records, the Subject Property is not located within a DWSPA. In addition, no DWSPAs are located within 1-mile of the Subject Property.

2.2.6 Sole Source Aquifers

Tetra Tech reviewed the U.S. Environmental Protection Agency (U.S. EPA) online interactive Sole Source Aquifer for Drinking Water database map to evaluate the Subject Property's location relative to potential nearby Sole Source Aquifers. According to the U.S. EPA map, the Subject Property is not located within a Sole Source Aquifer. Additionally, no Sole Source Aquifers are located within 1-mile of the Subject Property.

2.3 SUBJECT PROPERTY AND VICINITY GENERAL CHARACTERISTICS

The Subject Property is located in a mixed industrial and residential area within the city of Chillicothe (see Figures 1 and 2). The Subject Property is bordered to the north by residences and a nursing home; to the east by the city's wastewater treatment plant; to the south by railroad tracks followed by several commercial and industrial properties including Mighty Auto Parts wholesaler, Douglas Industries machine shop, and a construction company; and to the west by Douglas Avenue followed by residences and an auto repair shop.

2.4 CURRENT AND PAST USE OF THE PROPERTY

Current and past Subject Property use information was obtained from historic EDR records (such as Sanborn maps, topographic maps, aerial photographs, and city directories), the site reconnaissance, and an interview conducted with owner representative Mr. Seth Bowen during this Phase I PA. According to Mr. Bowen, the Subject Property is currently owned by the City of Chillicothe. The Subject Property was purchased by the New York Coal Company in 1938, and was then sold to Davon Inc., manufacturer of construction aggregates and other materials, in 1957. Davon Inc. donated the Subject Property to the City of Chillicothe in 1971 for the purpose of being used as a park. In the 1960 aerial photograph, the Subject Property appears to be a vacant field. The Subject Property currently consists of nine baseball diamonds with associated dugouts and equipment storage sheds, green space, park shelters, and a playset. Two asphalt parking lots are present on the western portion of the Subject Property.

2.5 DESCRIPTION OF STRUCTURES, ROADS, AND OTHER IMPROVEMENTS

The Subject Property is accessible from the west via an entrance from Douglas Avenue. Structures on the Subject Property are limited to baseball dugouts, equipment storage sheds, and park shelters. The Subject Property has access to electricity via American Electric Power (AEP), and water and sewer via the City of Chillicothe municipal system.

2.6 CURRENT AND PAST USE OF ADJOINING PROPERTIES

The Subject Property is located in a mixed industrial and residential area within the city of Chillicothe (see Figures 1 and 2). The Subject Property is bordered to the north by residences and a nursing home; to the east by a municipal WWTP; to the south by railroad tracks followed by several commercial and industrial properties including Mighty Auto Parts wholesaler and a construction company; and to the west by Douglas Avenue followed by residences and an auto repair shop.

According to the historical records review provided by EDR, the eastern adjacent City of Chillicothe WWTP has been present since at least 1960 when it first appears on aerial photographs. Surrounding properties have historically been residential to the north of the Subject Property and commercial and industrial to the south of the Subject Property.

3.0 USER-PROVIDED INFORMATION

The following sections summarize information provided by the Ohio EPA during Phase I PA work and investigative reviews.

3.1 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

Information regarding the Subject Property's current use and ownership was provided by the Ohio EPA within the project solicitation. The Subject Property is currently owned by the City of Chillicothe and is in use as a park with nine baseball diamonds.

3.2 PRIOR ASSESSMENTS AND SITE INFORMATION

Tetra Tech was not provided with any prior environmental reports for the Subject Property, such as Phase I or Phase II reports, surveys, asbestos documentation, or other environmental-related documentation.

4.0 RECORDS REVIEW

Tetra Tech reviewed available records to assess the environmental regulatory status of the Subject Property and other properties within a radius designated by Ohio VAP. The following subsections summarize the information obtained during the records review.

4.1 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

EDR completed an Environmental Lien and Activity Use Limitation (AUL) Search for the Subject Property (Appendix B). EDR did not identify any environmental liens or AULs for the Subject Property. Additionally, a search of environmental databases by EDR (Appendix C) did not identify any Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) or Federal Superfund Liens for the Subject Property.

4.2 STANDARD ENVIRONMENTAL RECORD SOURCES

EDR provided an environmental records search report for the Subject Property. Tetra Tech reviewed the results of EDR's search of standard environmental sources for the Subject Property (see Appendix C). The search of available federal, state, and local regulatory agency databases was conducted in an attempt to (1) determine if the Subject Property is listed in searched environmental databases and (2) identify facilities within the Ohio VAP-defined radius that could cause actual or potential environmental impacts to the Subject Property. A complete list of the federal, state, and local agency databases reviewed is provided in the EDR Radius Report (Appendix C). Table 2 below lists the sites identified within one mile of the Subject Property.

Table 2 - Sites Within One Mile of the Subject Property

Site Name	Address	Databases	Distance from Subject Property (miles)
Chillicothe Treatment Plant	405 Environmental Way	UST, AST, ARCHIVE UST, NPDES, FINDS, UST FINDER, ECHO, BIOSOLIDS	Adjacent E

Notes:

AIRS – Title V Permits Listing
ARCHIVE UST – Underground Storage Tank records that have been removed from the UST database
AST – Aboveground Storage Tanks
BIOSOLIDS – ICIS-NPDES Biosolids Facility Data
BROWNFIELDS – Ohio Brownfield Inventory
CORRACTS – Sites with RCRA Corrective Action Activity
CRO – Cessation of Regulated Operations Facility Listing
DERR – Division of Emergency and Remedial Response Database
E MANIFEST – Hazardous Waste Electronic Manifest System
ECHO – Enforcement and Compliance History Information
EDR Hist Auto – EDR Exclusive Historical Auto Stations
ENG CONTROLS – Engineering Controls Sites List

FINDS – Federal Index System
HIST ENG – Operation & Maintenance Agreements Database
HIST INST – Institutional Controls Database
HIST LF – Old Solid Waste Landfill
INST CONTROL – Institutional Controls Sites List
LUST – Leaking Underground Storage Tank database
NPDES – National Pollutant Discharge Elimination System Permit List
ODI – Open Dump Inventory
RCRA – Resource Conservation and Recovery Act
RCRA NonGen / NLR – RCRA Non-generator / no longer regulated
RCRA VSQG – RCRA Very Small Quantity Generators
SEMS ARCHIVE – Superfund Enterprise Management System Archive
SPILLS – Emergency Response Database
UIC – Underground Injection Wells Listing
US AIRS – Air Facility System Data
UST– Underground Storage Tank
UST FINDER – A comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data
UST FINDER RELEASE – Contains information about, and locations of, leaking underground storage tanks
VAPOR – Vapor Intrusion
VCP – Voluntary Action Program Sites

The fact that sites do or do not appear on a list does not necessarily indicate that environmental concerns do or do not exist. In addition, sites may not be mapped in a list search due to the inaccuracy of owner/operator records, government records, or errors occurring during conversion of the data by informational sources. Details regarding the EDR search are included within the EDR report (Appendix C).

Union Coal Company, located at 353 Douglas Avenue near the Subject Property to the southwest separated by an active railroad, is identified on several databases relating to the presence of USTs on the property which were removed in June 1995. According to the Ohio Department of Commerce Bureau of Underground Storage Tank Regulations (BUSTR) database, the UST closure was conducted under 1992 corrective action rules. The property was granted No Further Action (NFA) status from BUSTR in 1995; although, the closure soil sample results do not comply with current BUSTR Action Levels for volatile organic compounds (VOCs) and total petroleum hydrocarbons (TPHs). Additionally, the property is identified in the SPILLS database for a 2014 spill of diesel fuel on the property. The database does not list location, amount spilled, or whether a cleanup effort was made. However, based on the nature of contaminants (petroleum compounds), distance from the Subject Property, and hydraulic cross-gradient location relative to the Subject Property, the Union Coal Company does not appear to represent a REC relative to the Subject Property at this time.

Allied Chemical – Chillicothe Works Landfill, located approximately 0.068 miles west of the Subject Property, is identified by EDR as a historical landfill which closed in 1996. The waste type listed in the database is "general / unspecified". This landfill facility is associated with the former **General Chemical Corporation,** which was located adjacent to the landfill to the west. The FINDS database lists the property with the National Industry Classification System (NAICS) code #325188 "All Other Basic Inorganic Chemical Manufacturing". According to the RCRA database, the property is currently a non-generator but was a former generator of ignitable waste, corrosive waste, and reactive waste. Due to the former presence of hazardous waste and hydraulic upgradient location relative to the Subject Property, the Allied Chemical Landfill represents a REC.

The Former Wear Ever Facility, located 0.231 miles southeast of the Subject Property, is the source of a known plume of chlorinated VOCs that has previously been investigated by the Ohio EPA. Mr. Bowen provided Tetra Tech with a plume map from the Ohio EPA investigation (Appendix D). The plume appears to be hydraulically cross/downgradient from the Subject Property based on the estimated southeast groundwater flow direction, and the edge of the plume nearest the Subject Property is located

approximately 100 feet away from the southeastern corner of the Subject Property. The Subject Property's current use as recreational ballfields and park does not contain occupied structures. The Subject Property also does not contain potable water wells, and drinking water is provided locally by a public water supply source. Based on the cross/downgradient location of the plume, as well as the incomplete vapor intrusion and groundwater potable use pathways, upon discussion with the Ohio EPA TBA Program, the Former Wear Ever Facility does not appear to currently represent a REC relative to the Subject Property at this time.

EDR identified numerous properties within the one-mile VAP search radius. These sites were evaluated based on available information regarding current or past use and activities; known or suspected releases; regulatory history and status; proximity to the Subject Property; prevailing groundwater flow to the east and direction and/or surface drainage patterns. Nearby properties on the LUST database have received No Further Action (NFA) status from BUSTR. Based on this information, these surrounding properties do not appear to represent obvious evidence that would result in RECs or IAs at the Subject Property.

4.3 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

In accordance with the Freedom of Information Act (FOIA) and Ohio Public Records Law, Tetra Tech contacted the following agencies to request publicly available information regarding the Subject Property: U.S. EPA Region 5, Ohio EPA, BUSTR, the Chillicothe Fire Department, and Ross County Health District. Copies of the information request letters and responses, if any, are included in Appendix D. The results of the file requests are summarized below.

4.3.1 U.S. EPA, Region 5

Tetra Tech completed an online search of the U.S. EPA's Envirofacts database for records on the Subject Property on July 31, 2026. The search results identified the wastewater treatment plant adjacent to the Subject Property to the east, which is located on the same parcel. The database contains links to the FINDS, ECHO, and NPDES database listings identified by EDR and listed in Table 2. No violations are listed on the Envirofacts database.

4.3.2 Ohio EPA

Tetra Tech submitted an online records request to the Ohio EPA on July 27, 2026. A response has not been received within the timeframe of this report; should a response be received, that would alter the recommendations made herein, an addendum will be issued. Furthermore, Tetra Tech completed a search on the Ohio EPA eDocument database. The search returned numerous permits, inspections, and reporting documents for the adjacent wastewater treatment plant; however, the Subject Property was not identified in the search.

4.3.3 BUSTR

Tetra Tech completed a search of BUSTR's online database on July 31, 2026. The Subject Property was not identified in the search; however, the search did return record of three USTs at the eastern adjacent wastewater treatment plant: two 1,000-gallon gasoline tanks and one 2,000-gallon diesel tank. All three tanks are listed as currently in use, and no violations are listed in the database.

4.3.4 City of Chillicothe Fire Department

Tetra Tech contacted and requested a file review from the Chillicothe Fire Department on July 31, 2026. A response has not been received within the timeframe of this report; should a response be received, that would alter the recommendations made herein, an addendum will be issued.

4.3.5 Ross County Health District

Tetra Tech contacted and requested a file review from the Ross County Health District on July 31, 2026. Ms. Tara Jones of the Ross County Health District responded on August 4, 2026, stating that their office searched their records and found no files pertaining to the Subject Property.

4.4 HISTORICAL USE INFORMATION

Tetra Tech conducted a search of reasonably ascertainable historical use information for the Subject Property. Tetra Tech reviewed the EDR-provided aerial photographs, historical topographic maps, Sanborn Fire Insurance Maps (Sanborn maps), city directories search, tax maps, building permits, and chain of title search for the Subject Property. Copies of these documents are included in Appendix B.

4.4.1 Historical Topographic Maps

Tetra Tech reviewed available historical USGS Topographic Quadrangle maps for the years, 1906, 1908, 1961, 1971, 1975, 1985, 1995, 2013, 2019, 2019, and 2023 provided by EDR for information regarding past uses of the Subject Property and surrounding properties. The following table presents descriptions and interpretations from review of these historical USGS topographic maps.

Table 3 - Historical USGS Topographic Quadrangle Maps Review

Year	Description
1906	**Subject Property:** A railyard is present on the southern portion of the Subject Property. The remainder of the Subject Property appears undeveloped. **Surrounding Properties:** Surrounding properties are primarily small and unlabeled, indicating residences. The Scioto River is present approximately one-quarter mile east of the Subject Property.
1908	**Subject Property:** No significant change from the 1906 map. **Surrounding Properties:** No significant change from the 1906 map.
1961	**Subject Property:** The railyard is no longer present on the Subject Property; instead, railroad tracks run along the southern property boundary but are not present on the Subject Property itself. **Surrounding Properties:** The wastewater treatment plant is visible adjacent to the east and is labeled "sewage disposal," and a gravel pit is present just beyond that.
1971	**Subject Property:** Environmental Way is present along the eastern Subject Property boundary. **Surrounding Properties:** Highway 35 is present to the east of the Subject Property along the Scioto River. The wastewater treatment plant adjacent to the east has expanded. Developments surrounding the Subject Property have increased primarily to the north, east, and south.

Year	Description
1975	**Subject Property:** Two small unlabeled buildings, shaded purple to represent new developments, are present on the western portion of the Subject Property. **Surrounding Properties:** The wastewater treatment plant adjacent to the east has expanded. Newly developed large buildings appearing "industrial" in use are present to the south and southeast of the Subject Property.
1985	**Subject Property:** A third small building is present on the western portion of the Subject Property. **Surrounding Properties:** No significant change from the 1975 map.
1995	**Subject Property:** No significant change from the 1985 map. **Surrounding Properties:** No significant change from the 1985 map.
2013	**Subject Property:** No buildings are depicted on the Subject Property. The railroad tracks along the southern property boundary are not depicted on this map. **Surrounding Properties:** No buildings are depicted anywhere on the map.
2016	**Subject Property:** The railroad tracks are once again present along the southern property boundary. **Surrounding Properties:** No significant change from the 2013 map.
2019 - 2023	No significant change from the 2016 map. The Subject Property and surrounding areas appear similar to current conditions.

The topographic maps review depicts the Subject Property situated in a mixed-use residential and industrial setting. Three small unlabeled buildings are present on the Subject Property beginning in 1975; the locations of these buildings are consistent with the storage buildings and dugouts currently present at the park. A railyard is present on the southern portion of the Subject Property from approximately 1906 to 1961, and railroad tracks run along the southern Subject Property boundary from at least 1906 to 2023. The presence of a railyard on the Subject Property and the adjacent railroad tracks represents a REC.

4.4.2 Historical Aerial Photographs

Tetra Tech reviewed aerial photographs of the Subject Property and surrounding areas provided by EDR to identify historical land use that may have involved hazardous substances and petroleum products. The dates of the photographs reviewed were from 1960, 1971, 1975, 1983, 1988, 1994, 2001, 2006, 2011, 2015, 2019, and 2023. The following table summarizes descriptions and interpretations from the aerial photographs reviewed.

Table 4 - Historical Aerial Photographs Review

Year	Comments/Descriptions
1960	**Subject Property:** The Subject Property is an undeveloped grass field. **Surrounding Properties:** Railroad tracks are present running along the southern Subject Property boundary. The wastewater treatment plant is present adjacent to the east. A pond and an area that appears to be a fill pile are present further east. Properties to the north and west of the Subject Property appear primarily residential, while properties to the south are either industrial or agricultural.

Year	Comments/Descriptions
1971	**Subject Property:** A baseball diamond and parking area are present on the western end of the Subject Property, and Environmental Way is present running along the eastern property boundary. **Surrounding Properties:** The pond and fill pile to the east are no longer present. Highway 35 is present to the east. Properties to the south are now exclusively industrial.
1975	**Subject Property:** Two additional baseball diamonds are present on the Subject Property. **Surrounding Properties:** No significant change from the 1971 photo.
1983	**Subject Property:** Four baseball diamonds are present on the Subject Property, along with several dugouts and equipment storage sheds. **Surrounding Properties:** A bright white area which appears to be a fill pile is present adjacent to the Subject Property to the east.
1988	**Subject Property:** No significant change from the 1983 photo. **Surrounding Properties:** No significant change from the 1983 photo.
1994	**Subject Property:** Five baseball diamonds are present on the Subject Property. **Surrounding Properties:** No significant change from the 1988 photo.
2001	**Subject Property:** Seven baseball diamonds are present on the Subject Property. **Surrounding Properties:** No significant change from the 1994 photo.
2006	**Subject Property:** No significant change from the 2001 photo. **Surrounding Properties:** No significant change from the 2001 photo.
2011	**Subject Property:** No significant change from the 2006 photo. **Surrounding Properties:** The eastern adjacent fill pile appears to be unused and is becoming overgrown.
2015	**Subject Property:** No significant change from the 2011 photo. **Surrounding Properties:** No significant change from the 2011 photo.
2019	**Subject Property:** Nine baseball diamonds are present on the Subject Property. **Surrounding Properties:** No significant change from the 2015 photo.
2023	**Subject Property:** No significant change from the 2019 photo. **Surrounding Properties:** An excavated area is present adjacent to the wastewater treatment plant to the east.

The aerial photographs review indicates that the Subject Property has been undeveloped until its development as a park in approximately 1971. Surrounding areas were observed to be primarily residential to the north and primarily industrial to the south. The presence of the railroad tracks along the southern Subject Property boundary is considered a REC.

4.4.3 Sanborn Fire Insurance Maps

The EDR Certified Sanborn Map Report states that the Subject Property is located in an unmapped area. A copy of the EDR Report is located in Appendix B.

4.4.4 City Directories

A review of historical city directories was conducted by EDR. The Subject Property itself was not identified in the city directories for the years searched; however, the address of 405 Environmental Way is listed as the Chillicothe Wastewater Treatment Plant from 1995 to 2024 because the two properties are located on the same parcel. Surrounding properties are a mix of residential and commercial listings. The city directory review did not identify any obvious evidence of RECs or IAs associated with the Subject Property.

4.4.5 Building Permit

A review of building permits was conducted by EDR. The EDR Building Permit Report (Appendix B) provides a search of building department records for indications of environmental conditions. The complete collection of building permit data available to EDR has been searched, and as of June 29, 2026, EDR did not identify any building permits within the Subject Property boundary. However, several building permits for the adjacent wastewater treatment plant were identified. These permits pertain to equipment upgrades and expansion of on-property buildings. The building permit review did not identify any obvious evidence of RECs or IAs associated with the Subject Property.

4.4.6 Tax Map

The EDR Property Tax Map Report states that there was no coverage for the Subject Property. A copy of the EDR Report is provided in Appendix B.

4.4.7 Chain of Title

A review of available Subject Property chain of title documentation was completed by EDR. The Chain of Title Report (Appendix B) tracks a line of successive owners of a particular parcel of property, linked together by recorded transactions which pass title. The Chain of Title Report lists one deed from February 1936 recording transfer of the Subject Property from a private owner to the City of Chillicothe, Ohio. A note in the EDR Report states that this deed covers 20.02 acres of the 25-acre parcel. This size is consistent with the approximate size of the portion of the parcel containing the park. The Chain of Title Review did not identify any obvious evidence of RECs or IAs associated with the Subject Property.

5.0 SITE RECONNAISSANCE

This section discusses the reconnaissance conducted by Tetra Tech personnel at the Subject Property on July 7, 2026. The objective of the site reconnaissance was to obtain information regarding RECs and IAs in connection with the Subject Property and adjacent areas. The sections below discuss the Phase I PA methodology and limiting conditions, general setting, and Tetra Tech observations. Selected Subject Property photographs are presented within Appendix E.

5.1 METHODOLOGY AND LIMITING CONDITIONS

Tetra Tech performed a site reconnaissance of Subject Property. Tetra Tech observed accessible areas of the Subject Property; however, Tetra Tech was unable to gain access into the on-property storage sheds at the time of the site reconnaissance; they were found to be locked and the City of Chillicothe staff accompanying Tetra Tech did not have the keys to grant access. City staff informed Tetra Tech that they are used to store sports equipment and lawncare equipment.

5.2 CONDITIONS OBSERVED

The Subject Property is located in a mixed industrial and residential area within the city of Chillicothe (see Figures 1 and 2). The Subject Property is bordered to the north by residences and a nursing home; to the east by a city wastewater treatment plant; to the south by railroad tracks followed by several commercial and industrial properties including Mighty Auto Parts wholesaler, Douglas Industries machine shop, and a construction company; and to the west by Douglas Avenue followed by residences and an auto repair shop. The Subject Property is accessible from the west via an entrance from Douglas Avenue. The Subject Property currently consists of nine baseball diamonds with associated dugouts and equipment storage sheds, green space, park shelters, and a playset. Two asphalt parking lots are present on the western portion of the Subject Property. The area of the former railyard has been developed into an asphalt driveway that runs parallel to the railroad tracks. Tetra Tech did not observe obvious features related to the former railyard during the site reconnaissance.

5.2.1 Hazardous Substances, Petroleum Products, Containers, and Other Materials

Tetra Tech did not observe obvious evidence of hazardous substances, petroleum products, containers, or other materials on the Subject Property during the site reconnaissance.

5.2.2 Pools of Liquid and Odors

Tetra Tech did not observe obvious evidence of pools of liquid or odors on the Subject Property during the site reconnaissance.

5.2.3 Storage Tanks

Tetra Tech did not observe obvious evidence of aboveground storage tanks (AST) or underground storage tanks (USTs) located on the Subject Property.

5.2.4 PCB-Containing Equipment

Tetra Tech observed five pole-mounted transformers on and bordering the Subject Property. The transformers appear newer and in good condition, although a "No PCB" label was not observed.

5.2.5 Solid Waste and Debris Disposal

Tetra Tech observed two Rumpke dumpsters along the southern Subject Property boundary. The dumpsters are in good condition and are emptied weekly by Rumpke.

5.2.6 Floor Drains, Sumps, Wastewater, and Septic Systems

Tetra Tech observed several storm drains in low areas of the Subject Property parking lots and walkways. These are presumed to drain to the municipal storm sewer.

Tetra Tech did not observe obvious evidence of sumps, wastewater storage, or septic systems.

5.2.7 Stained Soil, Pavement, and Floors

Tetra Tech did not observe obvious evidence of stained soil, pavement, or floors during the site reconnaissance.

5.2.8 Pits, Ponds, or Lagoons

Tetra Tech did not observe obvious evidence of pits, ponds or lagoons during the site reconnaissance.

5.2.9 Wells

Tetra Tech did not observe obvious evidence of wells during the site reconnaissance.

6.0 INTERVIEWS

Various companies and governmental agencies were contacted regarding knowledge of the Subject Property. Responses received are discussed in Section 4.3 of this document. Tetra Tech interviewed Mr. Seth Bowen, Office Manager for City of Chillicothe Planning & Development, during this Phase I PA. Information provided by Mr. Bowen has been included throughout this Phase I PA report. Additionally, Mr. Bowen provided two figures showing the location of the Wear Ever chlorinated VOC plume relative to the Subject Property (Appendix D) and a fact sheet from the Ohio EPA regarding the former Wear Ever facility and the chlorinated VOC plume, summarized below.

- The fact sheet states that Wear Ever Aluminum operated at 1049 Eastern Avenue from 1948 until the late 1990s and produced aluminum products. Manufacturing waste associated with their operations included chlorinated solvents and metals. A known plume of chlorinated VOCs is located near the property. Previously, the nearby Pixelle paper manufacturing facility operated multiple water supply wells in the area which helped to contain the plume; however, the plant closed in April 2025, and water is no longer pumped from these wells.

- Historical clean-up actions at the property include the capping of contaminated soil and sludge, treatment of groundwater with air sparging/soil vapor extraction, and installation of sub-slab vapor venting systems.

7.0 VAP ELIGIBILITY

All property is eligible for the Ohio EPA VAP, except as provided within OAC 3745-300-02. A property that meets the description of one or more of the following criteria is ineligible for participation within the Ohio EPA VAP. Based on the information gathered by Tetra Tech during this Phase I PA, the Subject Property is currently eligible for participation within the Ohio EPA VAP.

7.1 NATIONAL PRIORITIES LIST (NPL) SITES

The EDR database search and Tetra Tech's agency file review did not identify the Subject Property as an NPL site.

7.2 PROPERTIES SUBJECT TO THE UNDERGROUND INJECTION CONTROL PROGRAM

Tetra Tech did not identify evidence related to the Subject Property being subject to requirements for site assessment, removal, or remediation regarding Class I, II, III, and IV underground injection control wells.

7.3 PROPERTIES SUBJECT TO FEDERAL OR STATE CORRECTIVE ACTION PERMIT OBLIGATIONS

Tetra Tech did not identify evidence indicating the Subject Property is subject to State or Federal Corrective Action permit obligations.

7.4 PROPERTIES SUBJECT TO FEDERAL ENFORCEMENT

Tetra Tech did not identify information regarding federal enforcement of the Subject Property, based upon response from the U.S. EPA information request.

7.5 CLOSURE REQUIRED OF HAZARDOUS WASTE OR SOLID WASTE FACILITY

Tetra Tech did not identify evidence indicating facilities at the Subject Property require hazardous waste or solid waste closure.

7.6 PROPERTIES SUBJECT TO UNDERGROUND STORAGE TANK SYSTEM SITE ASSESSMENT, REMOVAL, OR REMEDIATION

Tetra Tech did not identify evidence of UST systems currently under BUSTR enforcement.

7.7 PROPERTIES SUBJECT TO OIL AND GAS REGULATIONS

Tetra Tech did not identify evidence of current or past oil and gas production at the Subject Property.

7.8 PROPERTIES SUBJECT TO AN ENFORCEMENT LETTER

Tetra Tech did not identify evidence of the Subject Property being subject to an enforcement letter relating to a release or threatened release of hazardous substances or petroleum on or from the Subject Property, which poses a substantial threat to public health or safety or the environment.

8.0 FINDINGS

Based on the information reviewed during this Phase I PA, the Subject Property appears to be eligible for the Ohio EPA VAP. Tetra Tech identified likelihood of past releases and/or suspected releases associated with the Subject Property.

Based on the likelihood of past releases of petroleum or hazardous substances, Tetra Tech identified RECs and associated IAs at the Subject Property, as presented in Figure 3 and listed below. As defined by ASTM Standard E1527-21, a REC is the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. An IA is an area at a property where a release of petroleum or hazardous substances has or may have occurred, as defined by Ohio VAP guidelines 3700-300-06. The IAs and RECs identified at the Subject Property are presented below.

RECs:

1. The presence of a former railyard on the southern portion of the Subject Property as indicated by historical topographic maps.

2. The current presence of railroad tracks along the southern Subject Property boundary.

3. The presence of a historic landfill for Allied Chemical Company located hydraulically upgradient and in close proximity to the western end of the Subject Property.

IAs:

IA-01: Former and Current Railroad Operations. This area was designated as IA-01 due to the former presence of a railyard on the southern portion of the Subject Property and the current presence of railroad tracks located adjacent to the southern Subject Property boundary. Chemicals of concern (COCs) associated with IA-01 include VOCs, polynuclear aromatic hydrocarbons (PAHs), and metals.

IA-02: Area of Potential Impact from Off-Property Source. This area was designated as IA-02 due to the potential impact to Subject Property groundwater and/or soil gas from an off-site source near the Subject Property (historic landfill for Allied Chemical Company). COCs associated with IA-02 include VOCs, semivolatile organic compounds (SVOCs), and metals.

9.0 RECOMMENDATIONS

Based on the information obtained during the site reconnaissance, record reviews, interviews, and review of environmental history of the Subject Property, a release of hazardous substances and/or petroleum products has or may have occurred on the Subject Property. Tetra Tech recommends a subsurface Phase II PA to evaluate the RECs and IAs identified in Section 8.0.

10.0 DEVIATIONS

Tetra Tech conducted inquiries and completed research using guidance established by VAP standard practices. Deviations include inconsistencies and gaps within historical records. Additionally, Tetra Tech was unable to gain access to the on-property storage sheds during the site reconnaissance.

12.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, one or both of the undersigned meet the definition of "Environmental Professional" as defined in 40 CFR 312.13 and one or both of the undersigned have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

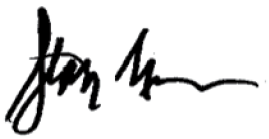

September 16, 2026

Emma Reynolds — Date
Environmental Scientist

Qualifications

Ms. Emma Reynolds is an Environmental Scientist for Tetra Tech. Ms. Reynolds holds a Bachelor of Science degree in Environmental Science from the University of Kentucky in Lexington, Kentucky. Her experience includes performing environmental Phase I and Phase II site assessments for state and private clients at various industrial and commercial sites, including leaking underground storage tank sites.

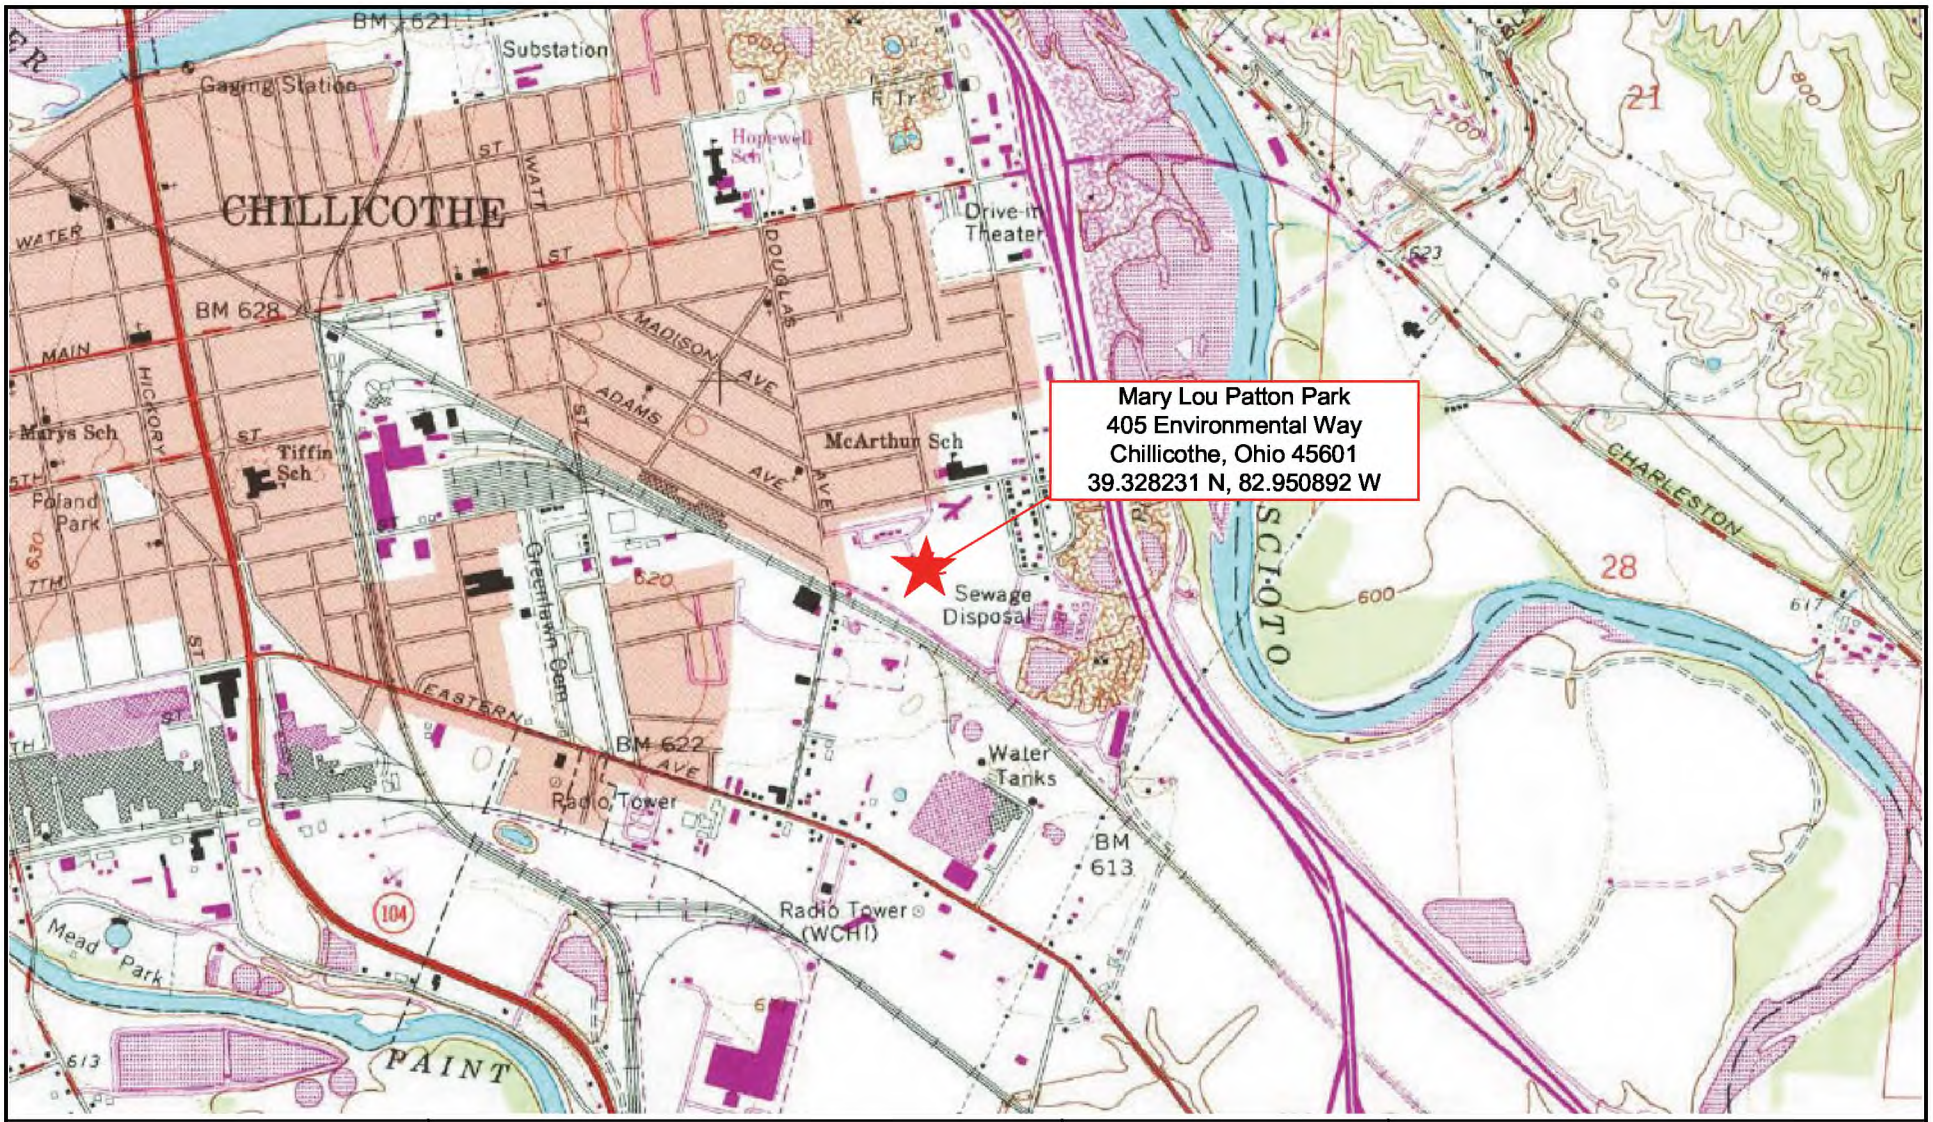

September 16, 2026

Stan Lynn — Date
VAP CP #367

Qualifications

Mr. Stan Lynn is a Senior Geologist for Tetra Tech located in Cincinnati, Ohio. Mr. Lynn has over 30 years of experience in the environmental field and is an Ohio EPA VAP Certified Professional (#CP367). He holds a Bachelor's degree in Geology. Mr. Lynn's experience includes performing hundreds of ASTM Phase I/II ESAs and VAP Phase I/II PAs for various clients at a wide variety of residential, commercial, and industrial properties throughout Ohio and the United States.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address and/or parcel information to:

- search for parcel information and/or legal description
- search for ownership information
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc
- search for publicly available environmental encumbering instrument(s) filed on or after the recording of the current deed; between the recording of the current deed and present
- provide a copy of any environmental encumbrance(s)
- provide a copy of the current deed when available

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Tetra Tech EM, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

File No. 325. Fees $1.00
Davis, Edwin H., Attorney
To
City of Chillicothe, Ohio

WARRANTY DEED
Gen'l Code, Secs. 8510,-1,-11,-15,-16.

KNOW ALL MEN BY THESE PRESENTS: That Edwin H. Davis, Attorney, of the City of Columbus, County of Franklin and State of Ohio in consideration of the sum of Five Thousand ($5,000.00) Dollars, to him paid by The City of Chillicothe, Ohio, a municipal corporation, of the County of Ross and State of Ohio the receipt whereof is hereby acknowledged, does hereby GRANT, BARGAIN, SELL and CONVEY to the said The City of Chillicothe, Ohio, its successors and assigns forever, the following REAL ESTATE, situated in the County of Ross in the State of Ohio and in the Township of Scioto and bounded and described as follows:

Beginning at a point in the north right of way line of the B & O. Southwestern R. R., said point being also the southeast corner of property now or formerly owned by P. J. Hoffman; thence N. 15 degrees 18' E. along said Hoffman's east line 600 feet to a point; thence S. 76 degrees 40' E. 1365.6 feet to an iron pin; thence S. 13 degrees 20' W. 344 feet to an iron pin; thence N. 76 degrees 40' W. 254 feet to an iron pin; thence S. 13 degrees 20' W. 50 feet to an iron pin; thence N. 76 degrees 40' W. 197 feet to an iron pin; thence S. 13 degrees 20' W. 566 feet to an iron pin in said north right of way line of the B. & O. Southwestern R. R.; thence along said right of way line on a curve radius of 5188.59 feet, to the left 1003.6 feet to the place of beginning, containing within said bounds 20.02 acres.

Being a part of the same premises conveyed by Phil D. Butler, Trustee, to Edwin H. Davis, Attorney, by deed dated February 29, 1936, and recorded in Vol. 222 page 267, Ross County Ohio Deed Records.

TO HAVE AND TO HOLD said premises, with all the privileges and appurtenances thereunto belonging, to the said The City of Chillicothe, Ohio, its successors and assigns forever.

And the said Edwin H. Davis, Attorney for himself and his heirs, do hereby covenant with the said The City of Chillicothe, Ohio, its successors and assigns, that he is lawfully seized of the premises aforesaid; that the said premises are FREE AND CLEAR FROM ALL INCUMBRANCES WHATSOEVER; and that he will forever WARRANT AND DEFEND the same with the appurtenances unto the said The City of Chillicothe, Ohio, its successors and assigns, against the lawful claims of all persons whomsoever. Save and except the last half taxes of the year 1935, due and payable June, 1936, which said Grantee assumes and agrees to pay

IN WITNESS WHEREOF, The said Edwin H. Davis, Attorney, and Elizabeth B. Davis, his wife who hereby releases her right of dower in the premises, have hereunto set their hands, this Twenty Ninth day of February 1936.

Signed and acknowledged

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/26/2026 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 06/07/2026 has revealed that there are 2 RCRA-TSDF sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/07/2026 has revealed that there are 3 RCRA-VSQG sites within approximately 0.25 miles of the target property.

State and tribal institutional control / engineering control registries

OH HIST INST CONTROLS: "Institutional control" is a restriction that is recorded in the same manner as a deed which limits access to or use of the property such that exposure to hazardous substances or petroleum are effectively and reliably eliminated or mitigated. Examples of institutional controls include land and water use restrictions. This database is no longer updated or maintained by the state agency.

A review of the OH HIST INST CONTROLS list, as provided by EDR, and dated 05/10/2005 has revealed that there is 1 OH HIST INST CONTROLS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
CSXT CHILLICOTHE YAR	***EAST 7TH ST & SOUTH***	***WNW 1/4 - 1/2 (0.422 mi.)***	***L48***	***272***

OH HIST ENG CONTROLS: Volunteers that complete a voluntary action that relies on the ongoing operation and maintenance (O&M) of an engineered control to make the site protective (e.g" cap systems and ground water treatment systems) must enter into a legally binding agreement with the Ohio EPA before the director issues a covenant not to sue. This O&M Agreement must describe how the remedy is constructed and how itwill be monitored, maintained and repaired. It also lays out inspection opportunities for the agency. Companies must document that they have the financial capability to operate any remedy relied on, before the agency will agree to enter into the O&M Agreement. The statute requires that the agency be notified of any change in ownership. This database is no longer updated or maintained by the state agency.

A review of the OH HIST ENG CONTROLS list, as provided by EDR, and dated 05/10/2005 has revealed that there is 1 OH HIST ENG CONTROLS site within approximately 0.5 miles of the target property.

2020 COR ACTION: The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

A review of the 2020 COR ACTION list, as provided by EDR, and dated 09/30/2017 has revealed that there are 2 2020 COR ACTION sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 11/21/2025 has revealed that

there are 7 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 11/21/2025 has revealed that there are 3 UST FINDER sites within approximately 0.25 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as "e-Manifest," will modernize the nations cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 11/30/2025 has revealed that there is 1 E MANIFEST site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

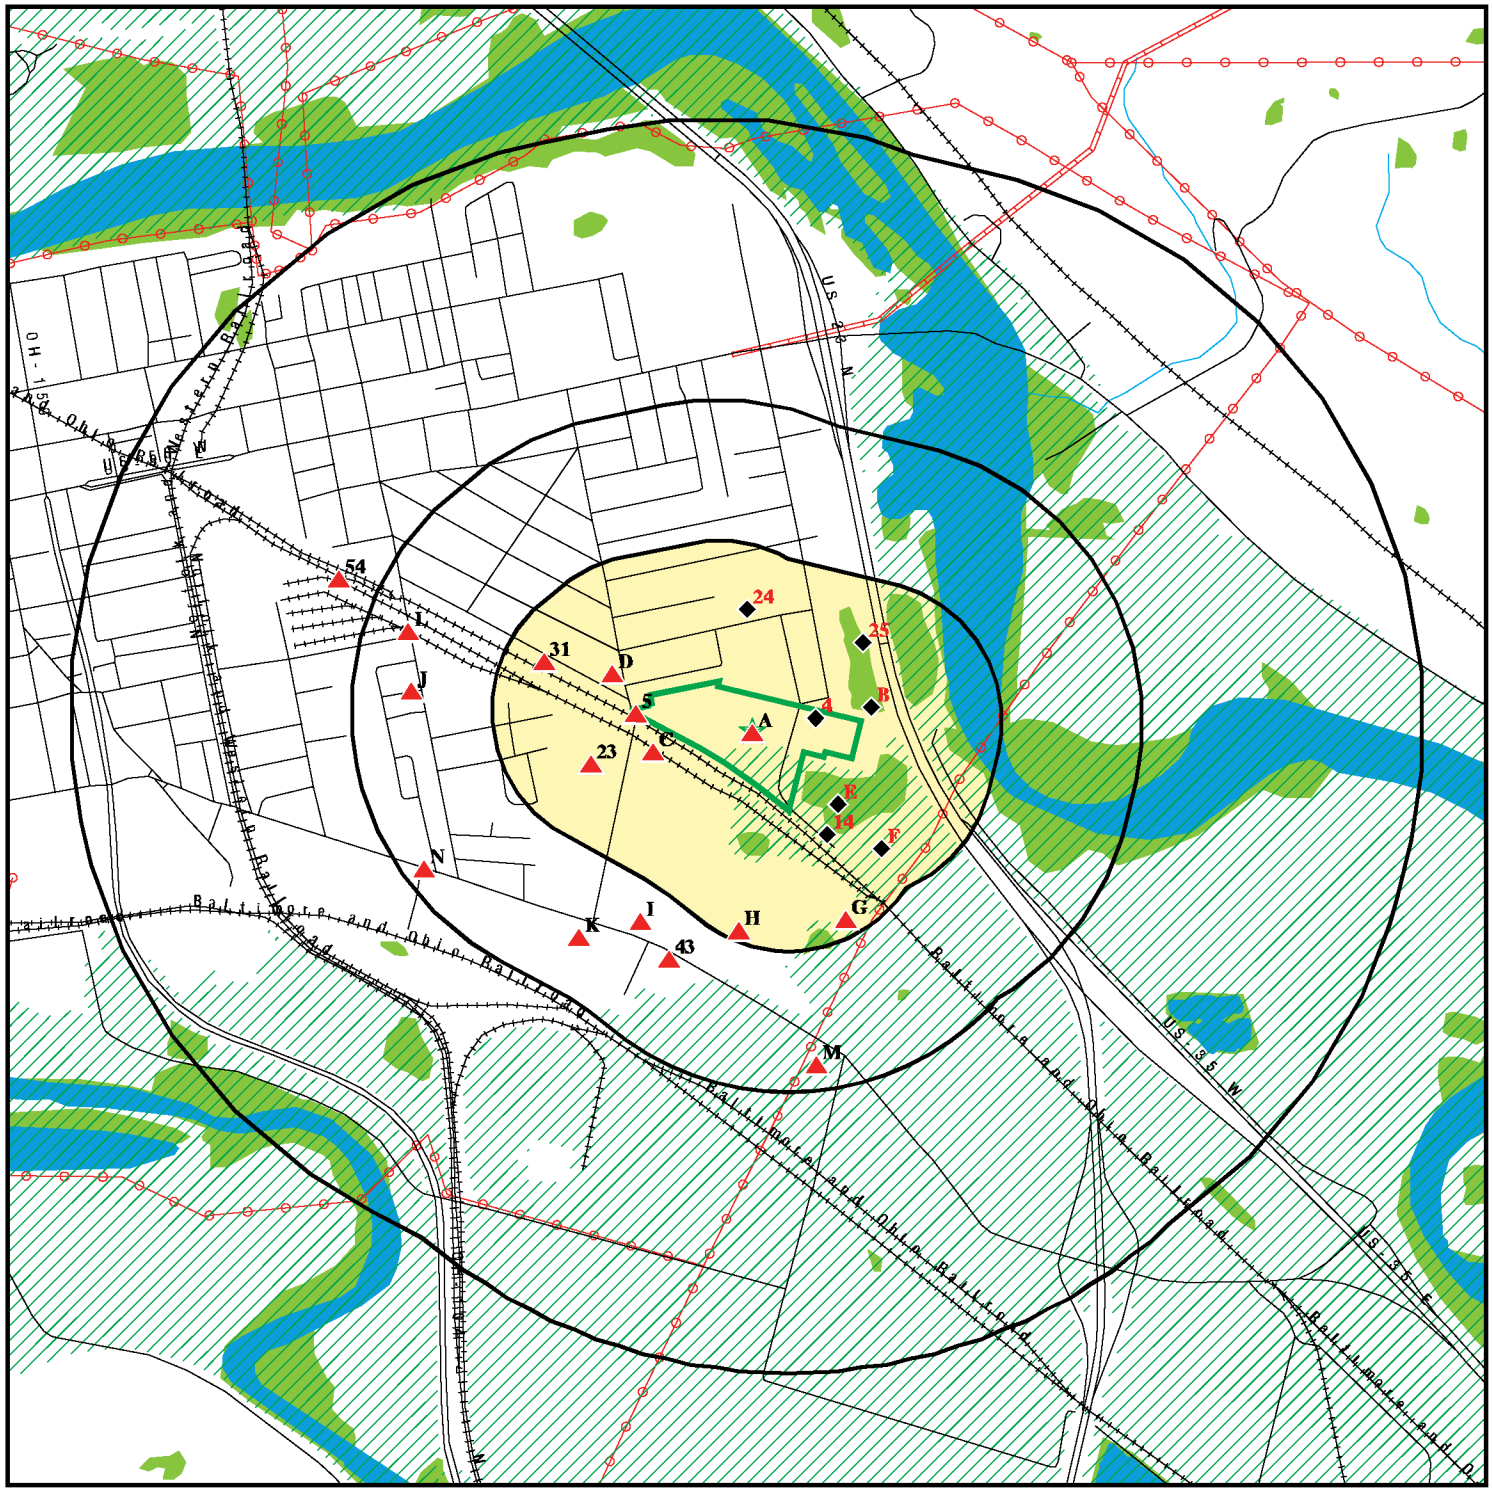

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

BARBER SPRING OHIO (Continued) **1000337737**

Environmental Interest/Information System:
The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D006
Waste Description: Cadmium

Waste Code: D008
Waste Description: Lead

Waste Code: D040
Waste Description: Trichloroethylene

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: U228
Waste Description: Ethene, Trichloro- (Or) Trichloroethylene

Environmental Interest/Information System:

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

HIST ENG CONTROLS:
NFA Number: 00NFA107
Alias: NA
Date NFA Submitted: 12/21/2000

CSXT CHILLICOTHE YARD - SOUTH PARCEL (Continued) **S106422154**

Date CNS Issuted: 11/08/2002
District Office: SEDO
Cp Certification Name: Ronald Roelker (old)
Cp Certification Number: CP157
Cp Certification Name: Atul Pandey
Cp Certification Number: CP224
Report Conclusions: No work/excavation has been conducted since the CNS was issued. Therefore, the CP indicates that there have been no O&M issues, and no engineering controls have been required since the CNS was issued.
Recent Report Date: 8/4/2004
Agency Comment Date: NA
Next Report Date: 07/31/2005
Complete: False
Comment Conclusions: NA
Reporting History: 7/7/04 - Mike Stello contacted Steve Williamson of B&W inquiring about the O&M report and was advised that they were no longer representing Chillicothe. 7/7/04 - Mike Stello contacted Rick Morris, Acting Transit Director with Chillicothe Transitand explained that VAP was separate from COF and that Chillicothe was bound to the CNS O&M agreement/plan until such time as the CNS was no longer in effect. Mr. Morris advised that Atul Pandey was the new consultant for the City and would be drafting the O&M report. 7/15/04 - Mike Stello contacted Atul's office and was advised by one of his staff that the O&M report would be sent out any day. The staff person said there had been no changes at the site and the report would be brief (a couple of pages). 7/1/04 - Report should have been perfomed April 2003, no report submitted since CNS was just granted a few months before?
Hist If Transferred To Diff Volunteer: Has been transferred to city of Chillicothe. Old CSX Contact person was Stacey Leitheiser, Environmental Manager, CSX Real Property, 301 West Bay St. Suite 800, Jacksonville FL 32202.
O&M Billing Number: Not reported
O&M Monitoring Frequency: Annual (April or May)
O&M Reporting Frequency: Annual (w/in 60 days of inspection)
O&M Plan Requirements: 1.) Use of interim measures during Property redevelopment until the permenant engineering controls are installed to address any windblown dust that may exceed applicable standards for the neighboring residences. Includes but not limited to a temporary layer of clean soil and implementation of an exposure mitigation plan (EMP) 2.) Exposure mitigation plan within the O&M plan to protect construction workers from exposure to elevated lead during excavation activities at the Property. 3.) Installation of a permenant pavement, structural or vegetative Engineering control as surface barriers to contaminated soils and maintenance.

General Comments:	This property was granted a Covenant Not to Sue by Ohio EPA in November 2002. This Covenant was issued following the VAP regulations in effect at the time, which included a lead stand of 2800 ppm. The City of Chillicothe has proposed to redevelop the site and utilize the new lead standard of 1600 ppm for construction worker pathway purposes and 1800 ppm for commercial/industrial land use.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 06/22/2026

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

DERR: Division of Emergency & Remedial Response's Database

The DERR listings contains sites from all of Ohio that are in the Division of Environmental Response and Revitalization (DERR) database, which is an index of sites for which our district offices maintain files. The database is NOT a record of contaminated sites or sites suspected of contamination. Not all sites in the database are contaminated, and a site's absence from the database does not imply that it is uncontaminated.

State and tribal institutional control / engineering control registries

HIST INST CONTROLS: Institutional Controls Database

"Institutional control" is a restriction that is recorded in the same manner as a deed which limits access to or use of the property such that exposure to hazardous substances or petroleum are effectively and reliably eliminated or mitigated. Examples of institutional controls include land and water use restrictions. This database is no longer updated or maintained by the state agency.

Date of Government Version: 05/10/2005

Data Release Frequency: No Update Planned

HIST ENG CONTROLS: Operation & Maintenance Agreements Database

Volunteers that complete a voluntary action that relies on the ongoing operation and maintenance (O&M) of an engineered control to make the site protective (e.g" cap systems and ground water treatment systems) must enter into a legally binding agreement with the Ohio EPA before the director issues a covenant not to sue. This O&M Agreement must describe how the remedy is constructed and how itwill be monitored, maintained and repaired. It also lays out inspection opportunities for the agency. Companies must document that they have the financial capability to operate any remedy relied on, before the agency will agree to enter into the O&M Agreement. The statute requires that the agency be notified of any change in ownership. This database is no longer updated or maintained by the state agency.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

Data Release Frequency: Varies

UST FINDER RELEASE: UST Finder Releases Database

US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

PFAS: PFOA & PFOS Site Listing

PFAS have been widely used in numerous industrial and residential applications since the 1950a??s. Their stability and unique chemical properties produce waterproof, stain resistant, and nonstick qualities in products. They are found in some firefighting foams and a wide range of consumer products such as carpet treatments, non-stick cookware, water-resistant fabrics, food packaging materials, and personal care products.

HIST USD: Urban Setting Designations Database
A USD may be requested for properties participating in the VAP when there is no current or future use of the ground water by local residents for drinking, showering, bathing or cooking. In these areas, an approved USD would lower the cost of cleanup and promote economic redevelopment while still protecting public health and safety. If these USDs were to be approved, the ground water cleanup or response requirements for the areas could be lessened. The Ohio EPA director may approve a USD request based on a demonstration that the USD requirements are met and an evaluation of existing and future uses of ground water in the area. The Ohio EPA director's decision on approval or denial of the request is needed before cleanup requirements for the site can be determined. This database is no longer updated or maintained by the state agency.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Target Property Map:	50027691 CHILLICOTHE EAST, OH
Version Date:	2023

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

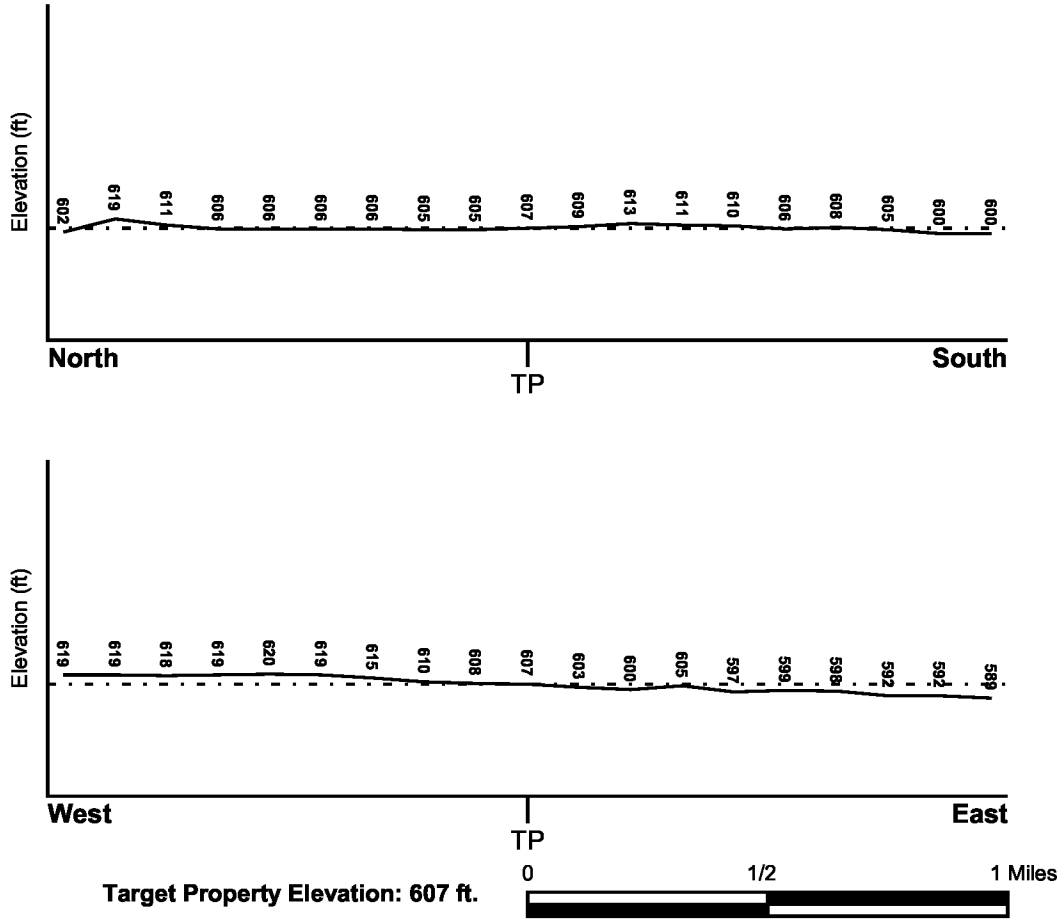

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
39141C0355D	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
39141C0375D	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Warsaw

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 705 Min: 141.14	Max: 8.4 Min: 7.9
2	11 inches	25 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 705 Min: 141.14	Max: 8.4 Min: 7.9

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
3	25 inches	27 inches	gravelly clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 705 Min: 141.14	Max: 8.4 Min: 7.9
4	27 inches	79 inches	stratified very gravelly coarse sand to sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 705 Min: 141.14	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: Ockley

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX D
CORRESPONDENCE AND FILE REVIEW DOCUMENTATION

Environmental Protection Agency

Former WearEver Aluminum Site Chillicothe

Background

WearEver Aluminum operated from 1948 until the late 1990s, producing aluminum cookware and other products. Past manufacturing generated waste containing chlorinated solvents (like trichloroethylene or TCE) and lead, cadmium, and other metals. Some of these materials contaminated the soil and groundwater beneath the property. Investigations of the site began in the 1980s Ohio EPA issued orders to clean up the site in *1993* and *1999*, including addressing a groundwater plume emanating from the site. The current property owners, Howmet, are responsible for mitigating contamination at the site.

A paper manufacturing facility began operating on property west of WearEver using groundwater wells to feed the manufacturing process at the current Pixelle facility. The groundwater wells helped contain the flow of the contaminated groundwater. In April 2025, Pixelle announced the closure of its plant at 232 E 8th St, Chillicothe, OH 45601 The closure will include shutting down several large -volume groundwater pumping wells. Two of these wells, #17 and #18, are near the WearEver site and have helped contain the contaminated groundwater plume. The WearEver orders recognized the potential for the cessation of pumping from Pixelle wells. To address the potential well shutdown, Ohio EPA has directed Howmet to:

- Install additional monitoring wells to act as sentinel wells and allow sufficient time to respond to changes to the WearEver plume.
- Evaluate potential risks to human health and the environment from contaminant plume expansion/migration.
- Submit a revised plan that ensures long-term control of the contaminant plume.

Current Conditions

- The WearEver site remains under regulatory oversight and long-term monitoring.
- The former WearEver site is nearly two miles downgradient from the nearest community water system's source water protection area.
- The groundwater plume is located over 1.5 miles from an area designated as potentially impacting other public drinking water sources within a 5-year timeframe.
- Drinking water in nearby homes is provided by the Chillicothe public water system and is not affected by site contamination.
- If Pixelle's wells shut down, the groundwater plume will not immediately move. Ohio EPA is working with Howmet to increase monitoring to ensure the continued protection of human health and the environment.

Former WearEver Aluminum SiteChillicothe

Historical Clean-up Actions

- Soil and Sludge: In 2001, contaminated soil and sludge were consolidated and capped with impervious materials to prevent direct exposure and leaching.
- Groundwater Treatment: Groundwater is encountered approximately 25 feet below the surface. Air sparging/soil vapor extraction (AS/SVE) systems operated from 1999 to 2006 to treat solvent-impacted areas. The systems are no longer in use, based on a determination by Howmet and Ohio EPA that they had reached the limits of their effectiveness.
- Air (Vapor Intrusion): In 2016, indoor air tests detected TCE in two unoccupied areas on the WearEver property. Howmet installed sub-slab venting systems in 2018 to prevent vapors from entering buildings.
- Institutional Controls: Deed restrictions for the Howmet/WearEver property prevent the potable use of on-site groundwater.

Community Protections

- Groundwater: Groundwater monitoring wells are sampled quarterly.
- Consolidated Soils Sludge on-site): All caps installed will continue to be inspected.
- Drinking Water Protection: Two homes adjoin the WearEver site to the southeast; these homes are connected to and utilize city water.
- Indoor Air (on-site): Sub-slab depressurization systems beneath the Howmet facility building and are monitored and properly maintained .

Public Documents Available

Documents associated with the former WearEver facility are available electronically through Ohio EPA's *eDocument Search*, using search criteria for the Secondary ID: *471000894*. Documents associated with the former WearEver facility that are not currently available electronically can be requested by submitting a *File Review Checklist Form*.

Community

Demographic Profile of Surrounding Area (1-Mile Radius)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2023 American Community Survey (ACS) 5-year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. Census boundaries and demographic data for U.S. Territories are based on the "2020 Island Areas Demographic Profiles" from the U.S. Census Bureau. EPA's spatial processing methodology considers the overlap between the selected radii and ACS census block groups in determining the demographics surrounding the facility. For more detail about this methodology, see the DFR Data Dictionary <https://epa.gov/help/reports/dfr-data-dictionary#demographic>.

General Statistics (ACS (American Community Survey))

Requesting records, if any, associated with this address. WWTP for the city also on this parcel.

Please complete the rest of the form as to from which division / divisions you are requesting the information from (Please note we are unable to search b parcel number):

This checklist is for files within districts, some files may need to be requested from Columbus.

Columbus files: Some documents are sent and housed in our Columbus office only and are not available for review at the district. Please email Rich Bouder to request these files. Examples:

- Emergency Response Incident Reports
- Toxic Release Inventory
- Financial Assurance Documents
- RCRA Biennial Reports
- Clean Ohio Files
- Wastewater & Water Plant Operator Certifications
- DAPC Major Permit Review Documents
- Notification of Regulated Waste Activity (HazWaste ID)
- Waste Minimization Documents

DISTRICT OFFICE DIVISIONS:

(Please check each area within each division you would like us to search for files)

Division of Air Pollution Control (DAPC)

- General Correspondence
- Air Permits
- Permit Applications
- Open Burning Program
- Air Complaints
- Reports: Compliance
- Reports: Emission
- Report: Inspection
- Notice of Violations
- Asbestos Program
- Stack Tests

NOTE: Depending on the facility location(s), you may also need to request records from the appropriate local air agency (LAA.

Division of Surface Water (DSW)

- Notice of Violations
- Permits/Inspection/Compliance
- Permit Applications
- Discharge Monitoring Reports (eDMR)
- Sludge/Biosolids
- Water Quality Reports/TMDL
- Wetland and Stream Permitting (401)
- Stormwater
- Sanitary Sewer Extension (SSX)

Division of Materials and Waste Management (DMWM):

Solid Waste Section (Formerly DSIWM)

- Construction & Demolition Debris (C&DD)
- Scrap Tires
- Composting
- Open Dumping
- Infectious Waste
- Landfills
- Transfer Stations
- Incinerators

Hazardous Waste Section (Formerly DHWM)

- Notice of Violations
- RCRA C-Hazardous Waste
- RCRA Corrective Action Files
- RCRA Ground Water Files
- RCRA Closure Files
- Cessation of Regulated Operations (CRO)
- Permitting Files

Division of Environmental Response and Revitalization (DERR)

- Remedial Files
- No Further Action (NFA) Files
- Covenant Not to Sue (CNS) - Final
- I. C. 5 Year Report
- Operation & Maintenance (O&M)
- Risk Mitigation Plan (RMP)

Division of Drinking and Ground Waters (DDAGW)

- General Correspondence
- Lead and Copper Files
- Plan approvals, well logs, etc.
- Monthly Operating Reports (MORs)
- Notice of Violations
- Ground Water Characterization Data/Ambient Data
- SWAP/WHP (Source Water Protection/Wellhead Protection)

Outlook

Mary Lou Patton Park
